YEAR'S WORK OF BOARD OF TRADE

Seventh Annual Report Is Submitted at Yesterday's Session.

MUCH PROGRESS IS NOTED

Hon. Messrs Tatlow and Green Attend and Deliver Encouraging Speeches.

THE twenty-seventh annual meeting of the Victoria, B. C., Board of Trade was held yesterday afternoon, at which there was a fairly large attendance. During the meeting Hon. R. F. Green and Hon. Capt. Tatlow were present and addressed the members of the board, dealing with the annual report and its reference to the affairs of the province.

President T. W. Paterson, M. P., occupied the chair and among those present were: Capt. Troup, L. Crease, H. A. Munn, J. J. Challoner, W. T. Andrews, W. J. Hanna, R. H. Swinerton, Capt. J. G. Cox, F. S. Barnard, C. H. Lugin, S. Jones, D. R. Ker, J. A. Mara, J. Christie, E. E. Wootton, Thos. Earle, W. H. Ambury, Edgar Dewdney, W. H. Bone, F. A. Pauline, S. Leiser, S. Johns, H. B. Thomson, H. B. Mackenzie, W. C. Cameron, M. P. P., J. Kingham, Walter Walker, E. B. Marvin, H. G. Wilson, J. H. Rickaby, J. Radiger, P. McQuade, C. F. Todd, S. J. Pitts, E. Pearson, Geo. McCandless, Anton Henderson, A. B. Fraser, Sr., R. B. McKelving, W. McKewen, W. Laird, H. D. Helmcken, J. E. Church, N. Hardie, A. S. James, E. Temple, Jas. Thomson, E. E. Billinghurst, Richard Hall, M. P., and Secretary Elworthy.

The minutes of the last meeting were read and on motion adopted, after which the chairman announced that the election of officers would be taken up. He also said that there had been some discussion as to who were entitled to vote, and pointed out that only those who had paid their dues were entitled to the privilege. Regarding the vice-president, he stated that at the last election there had been a slight mixup regarding the procedure. He stated that Mr. Bodwell had given his opinion that it was necessary that the successful candidate should receive a majority of the votes in the room, and it was for the meeting to decide how the election was to be made.

Mr. Pitts moved that the candidate receiving the largest number of votes shall be the choice of the meeting. This was carried.

The chairman then announced that Mr. J. A. Mara had been elected to the presidency of the board by acclamation and the same course had been taken with Mr. Elworthy for secretary. Messrs. Mara and Elworthy both suitably acknowledged the honor and expressed the wish that the board would continue to advance as it had in the past few years.

The chairman stated that an invitation had been extended to Lieut. Gov. Dunsmuir and the members of the cabinet to be present. His Honor was unable to accept the invitation and that Hon. Capt. Tatlow would be present to represent the government.

The scrutineers then proceeded with the election of vice-president, the council and board of arbitration.

The president's address was then read, as appended:

During the reading of the address Hon. R. F. Green chief commissioner of lands and works and Hon. Capt. Tatlow minister of finance, entered the room and were greeted with loud applause.

Hon. Capt. Tatlow said it was the third occasion that he had had the pleasure to speak at the meeting, and this time he came accompanied by the chief commissioner of lands and works, but he had to apologize for the absence of the premier. Personally he said he would have liked to have the premier present as the report contained many references to matters that he was interested in. He thought that the report was mainly imperial and not provincial and for that reason he would not deal with it at length. Regarding the question of a bridge at Seymour narrows he said it was a very important matter and he was pleased to see that Hon. Mr. Tem-

pleman had promised that at the next session of the House of Commons a grant would be made to carry out the investigation. Although the report did not refer to their connection with the Dominion under the title of "better terms," he saw by the report that they had dealt with the matter and was pleased to see that British Columbians were realizing that it was necessary to have "better terms" without having to go into the question of any political influence.

Regarding the financial position of the province he said he must heartily agree with the clause in the report dealing with the subject and he thought that their position was such that they might be able to carry out the suggestions. He pointed out that the bureau of information was in a manner in a good place to give all information and he stated that during the past year they had received more applications for information than ever before. He referred to the trip of the "provincial mineralogist" and hoped that the information gained by the party would lead to the settlement of the Peace river section and it was very likely that the surveys would enable to define their share of the 3,000,000 acres. He also referred to the survey parties on Vancouver Island, and Bulkley valley, and said that they hoped to have Bulkley ready for settlers when they began to come in. Referring to the agriculture outlook for the province he said that the provincial supply was increasing at a very fair rate, but although they had sent out \$4,000,000 for butter, milk and cheese, the "products for the past years has been over \$6,000,000. He had great satisfaction in saying that the good financial position of the province was largely due to the exploitation of its natural resources.

Lumbering had greatly increased—licenses and taxes' receipts so far this year were an increase over the same period last year and although they only estimated a revenue of \$825,000 they had produced over \$500,000. The actual production for the mills last year was 510,000,000 feet, and it was only about half their capacity and it was steadily increasing. The nominal condition is also good, the revenue produced being \$22,000,000 and all the ore being smelted in the province. New smelters were erected and old ones given a large capacity and he was proud that the output was being handled in the province.

The revenue for the province was about \$50,000,000 for 200,000 people, which was a result that all should be pleased with. This section of the province was doing her share. He was of the opinion that the country had entered on an era of prosperity that it was impossible to say where it would end and hoped that people would continue to work together in the future in the past.

He extended his best wishes for the success of the efforts of the board. (Applause.)

Hon. R. F. Green was greeted with applause when he came forward in reply.

NEWS NOTES OF THE DOMINION

A Young Lady of Montreal Sues Bank Manager For Breach of Promise.

MONTREAL, July 13.—Miss Emma Cushing has instituted an action for breach of promise of marriage against K. M. Christie, the former manager of the Canadian Bank of Commerce here but now stationed at their branch at Penticton, B. C. Miss Cushing claims in an itemized account damages to the extent of \$32,000. Miss Cushing applied for a writ of attachment on monies held by Mr. Christie. This was refused, the judge holding that there was no ground for the claim that Mr. Christie had left the province for the purpose of defrauding his creditors and his claim in particular. Among the items in the account for damages is one for \$15,000 for loss of support for an estimated lifetime of 25 years, \$200 for presents, \$10,000 for medical attendance as the direct result of his refusal to marry her, and \$5000 for lacerated feelings.

Toronto University

Toronto, July 13.—Professor Maurice Hutton, president of University college was this morning appointed acting president of the Toronto university to fill the vacancy caused by the resignation of President Leeson.

Four bucketshop men made a public promise in the court this morning never to enter the business again in Ontario. With that promise they were discharged seven others pleaded not guilty, and elected to be tried by a jury at the fall session.

Items From MacLeod

MacLeod, July 13.—A man named Pryelan, who smuggled two horses in from the United States appeared for trial Tuesday and was fined \$50 and costs and the animals were confiscated. C. P. R. tracklaying gang completed the road into town today. After the necessary ballasting is done and the road is put in running shape passenger trains will give the old station the go by and deposit passengers in town. The C. P. R. have in contemplation considerable work. So far this summer material has arrived for the new roundhouse and other buildings. A new telegraph line following the new extension into the town will also be started soon and numerous side tracks for the accommodation of increased traffic put in here.

Fine Crop Prospects

Wheat never looked better than it does now. The fall wheat in many sections will be ready soon for the binder. If the weather keeps good, in from eight to twelve days. Spring wheat is in full head and has a length of from two to three feet in many instances and certain fields will be ready to cut in three weeks' time. Barley is also looking good, most of it being well headed out. In parts, owing to the lack of grey, in the early spring considerable damage was done to the grain by the cutworm but no other damage has been reported.

OTTAWA HOUSE IS PROROGUED

Federal Parliament Completes Work of the Session and Adjourns.

VERY CURIOUS OVERSIGHT

Lord's Day Bill So Worded as Not to Apply to the Yukon.

OTTAWA, July 13.—(Special)—The second session of the tenth parliament of Canada closed shortly after noon today. The day was gloriously fine, but the attendance on Parliament Hill was not large, owing to the inconvenient hour. There were many vacant seats in the Senate chamber, although the galleries were well filled. After assent had been given to 121 bills, making 184 in all, parliament was formally prorogued by His Excellency. The speech referred to the invitation to the King to visit Canada, and the prosperity of the country; also to the great volume of immigration. Among the acts of "great public utility" passed this session and mentioned are the Lord's Day, Usury, Marking Fruit, Immigrants and Immigration, and Forest Reserves. The hope is expressed that the different provinces will adopt a system of reforestation, thereby preserving the uniform flow of rivers and valuable water powers.

The Lord's Day Bill

The speech from the throne proroguing parliament is a unique document. It speaks of "several acts of great public utility" which have been added to the laws of the country, among them being the act for the better observance of the Lord's Day. The more this measure is examined the more apparent it becomes how fearfully and wonderfully it is made. It was pointed out this evening by a well known parliamentarian that the Yukon Territory is absolutely outside the pale of this law. The amendment inserted by the Senate providing that a prosecution can only be instituted upon authority of the attorney-general of the province in which the alleged offence is committed, confines the operation of the act to the nine provinces of the Dominion, either the commissioner of the Territory or his legal adviser should have been mentioned. The exclusion of the Yukon, by accident or design, from the operation of the statute will not be unwelcome news to the miners of the territory, as with their short summer season for sluicing or washing they were not clamored of any proposal to restrict their operations.

A cable message from Tokyo today to Consul-General Noss advised him that ratifications of the Japanese-Canadian commercial convention were exchanged today.

Speech From the Throne

The following is the speech from the throne delivered by His Excellency:

Hon. Gentlemen of the Senate: Gentlemen of the House of Commons: In relieving you from further attendance in parliament, I desire to thank you for the care and assiduity exhibited in the discharge of your laborious and exacting duties.

Your invitation to His Majesty the King to visit this part of his dominions was duly forwarded to Buckingham Palace. That it would be a source of great rejoicing in Canada if His Majesty would favorably entertain the invitation is confirmed by the several provinces, cities and towns, all expressing the hope that His Majesty may honor us with another visit.

It is very gratifying to note that Canada continues to enjoy a prosperity rarely equaled in the history of the nation. The volume of exports and imports during the year just closed exceeds that of any previous record. The revenue also shows a remarkable increase, the receipts on account of the consolidated fund having doubled in the last ten years.

The large number of private bills that have received your approval, having for their object the incorporation of railway and other industrial enterprises, affords additional evidence of the general prosperity prevailing over the Dominion.

The stream of immigrants seeking homes in the western provinces continues to flow in increasing volume, and owing to the favorable conditions now existing in Alberta and Saskatchewan, their vacant lands are being rapidly taken up.

Several acts of great public utility have been added to the laws in the session now drawing to a close. Among the number I am glad to note an act for the better observance of the Lord's Day, an act to secure the better marketing of fruit, an act requiring that certain articles containing a portion of gold and silver when offered for sale should be honestly marked, an act relating to immigrants and immigration, which among other provisions will enable the authorities to deport undesirable persons.

It is earnestly to be hoped that your example in passing the act setting apart large areas of forest reserves will be followed by those provincial legislatures having jurisdiction over their public domain, and that a system

of reforestation may be adopted in all parts of the Dominion, thereby preserving the uniform flow of our rivers and of our valuable water powers.

In view of the many important acts passed and of the numerous amendments made to existing laws during this session, it has been found expedient to stay the issue of the volumes of the revised statutes in order that the recent legislation may be embodied.

Gentlemen of the House of Commons: I thank you in His Majesty's name for the supplies you have so liberally voted.

Hon. Gentlemen of the Senate: Gentlemen of the House of Commons: A copy of the convention regarding commercial relations between Japan and Canada has now been received. The treaty has been duly ratified and exchanged, thereby giving Canada material advantages in our trade with Japan.

I now express the hope that on your return to your several homes you will find evidence that the coming harvest will be a bountiful one, thus assuring a number of years of prosperity throughout the Dominion.

Consolidated Federal Statutes

The consolidation of the federal statutes has been held back to embody legislation this session. Mention is made of the fact that the commercial convention with Japan has been ratified and is now in operation between the two countries. The Hon. Mr. Ashcroft, has been appointed deputy judge of Cariboo during the illness of Judge Cornwall.

BAPTIST CONFERENCE CLOSSES.

Church Gathering at New Westminster Brought to an End.

New Westminster, July 13.—(Special)—The Baptist conference concluded its sessions this evening with a crowded meeting, which was addressed by the president of the Nova Scotia convention, Dr. Kierstead of McMaster University and other prominent visitors. At the closing meetings the Summerland college scheme was fully adopted, and the 1907 convention will be held in the college buildings, which will be completed by that time. A. Huggatt of Victoria was selected as convention preacher.

The provincial university proposal was not endorsed by the convention, although sympathized with its objects was expressed. The chief feature of the whole convention was the adoption of a resolution approving the project of a Dominion convention exercising general supervision over the whole Baptist work of the Dominion, provincial conventions, however, to maintain their individuality and local control.

HAPPENINGS OF THE PACIFIC COAST

Mayor Schmidt of San Francisco Dismisses Last of Police Commission.

SAN FRANCISCO, July 13.—Thos. F. Regan, the last remaining member of the police commission, was dismissed today by Mayor Schmidt, the mayor gave as his reasons for the dismissal, Regan's disloyalty to the administration and an irreconcilable conflict between private business and obligation to public life.

Study American Methods

Ten Japanese army officers are, it is said, to be given railroad positions on the Southern Pacific and allied roads. The object of sending these army officers to this country is to enable Japan, through their experience here, to improve its railroad service and operation, and also its railroad accounting methods.

Earthquake's Origin

San Jose, Cal., July 13.—Dr. David Starr Jordan, in a lecture delivered last night, located the origin of the recent seismic disturbances in the Bering Sea, and prophesied that the centre of trouble would be in the vicinity of San Leandro and Haywards, California.

THAW SHORT OF FUNDS.

Report That Prisoner Must Await Mother's Arrival for Money.

New York, July 13.—Harry K. Thaw, in the Tombs for the murder of Stanford White, is reported to be without funds, and it is stated that the elaborate plans which have been made for his defence cannot be put into execution until the prisoner's mother arrives from Europe and approves the necessary expenditure.

CENTRAL AMERICAN FRACAS.

Revolutionists Claim Speedy Downfall of Guatemalan Government.

Mexico, July 13.—Today's advices from Salvador confirm the news of the battle of Elcarigo and the killing of a number of Salvadorean troops under General Rigalado, but announces a victory gained by General Toledo and the insurgent forces on the same day at a point further north where the Guatemalan army was routed by heavy loss. General Toledo now has artillery. Revolutionists now claim Nicaragua will take part in the war and allow her gunboats to aid the revolutionists which they insist will result in the speedy downfall of President Cabrera of Guatemala.

DUEL OVER THE DREYFUS AFFAIR

Government Official Dangerously Wounded in an Encounter With a Deputy.

SCENES OF GREAT TUMULT

Attempt May be Made to Reach Persecutors of Unfortunate Officers.

PARIS, July 13.—The scene of tumult which marked the enactment today of the law restoring Dreyfus to the army was followed by a bloody duel tonight in which Under Secretary of State Sarraut was dangerously wounded by the sword of M. Puglisi-Conti. The duel assumed the aspect of a veritable combat between the government and the opposition as M. Sarraut's seconds were Ministers Clemenceau and Tomson. While M. Puglisi-Conti's seconds were M. Millevoye and General Jacques who were drawn from the elements which bitterly resisted Dreyfus' rehabilitation. The meeting followed a fight on the floor of the chamber of deputies, in which M. Sarraut sprang from beside Minister of the Interior Clemenceau, sitting on the ministerial benches on M. Puglisi-Conti, who had been heaping denunciations on the members of the government as scoundrels. Sarraut struck Puglisi-Conti a stunning blow in the course of efforts for the triumph of truth at the risk of definitely breaking his career. We demand that parliament expunge the effects of his action by the confinement of the rank of Brigadier with priority over Brigadiers.

A Measure of Justice.

Early in the day M. Etienne presented the government bill restoring Dreyfus and Picquart to the army. M. Etienne, explanatory of the preamble to the Dreyfus bill said: "A decision has judicially and definitely established the innocence of the accused, involving ipso facto, his reinstatement in the army, and expunging his condemnation. The government while powerless to repair the immense material and moral injury sustained by the victim of a deplorable judicial error, restores to Dreyfus his place which he would have occupied if his military career had not been interrupted."

The preamble to the Picquart bill said: "The preamble of the restoration of Dreyfus demonstrates the legitimacy of Picquart's loyalty and courageous efforts for the triumph of truth at the risk of definitely breaking his career. We demand that parliament expunge the effects of his action by the confinement of the rank of Brigadier with priority over Brigadiers."

Excitement in Chambers

Amid great excitement, the chamber considered the bill reinstating Dreyfus and passed it by a vote of 473 to 42. A tumultuous demonstration greeted the announcement of the vote. There were two violent incidents as the voting began. The first was shouted at and directed at the Socialists, whereupon M. Lasies, anti-Semite rushed at his colleague and attempted to strike him but several deputies intervened. At the same time M. Flandan, republican and M. Ghesquiere were separated after an effort to exchange blows. President Brasseur, in announcing the result, said: "It is with pride that I register this vote, consecrating the triumph of virtue."

A fight occurred in the centre of the chamber as M. Pressenz, Socialist demanded that the government prosecute the guilty officers. M. Puglisi-Conti, Republican, shouted: "The government officers are scoundrels."

M. Sarraut, Radical Socialist, then sprang forward and struck M. Puglisi-Conti a stunning blow in the face. A scene of tremendous confusion followed, during which the aisles were invaded by struggling deputies.

President Brasseur then suspended the session and ordered the chamber to be closed and cleared, which measure was subverted the tumult. Later M. Puglisi-Conti sent his second to M. Millevoye and M. Lasies sent his seconds to M. Sarraut as the result of the afternoon's scene.

Honors for Zola's Remains

After the scene which compelled the suspension of the session, the deliberations were resumed, the members having become more calm. After Premier Serioff announced that the government would take the necessary measures to deal with the officers who had been witnesses against Dreyfus, a motion was passed expressing confidence in the government. The chamber also voted to transfer the body of Emile Zola to the Pantheon.

President Fallieres tonight signed the enactments for the re-habilitation of Dreyfus to be a commander of squadron, the time elapsed since the dismissal from the army to count as full service.

The municipal council of Paris adopted a resolution to name a principal street Emile Zola, in recognition of the late novelist's defence of Dreyfus. The city council of Lyons has decided the erection of a monument to Zola.

May Prosecute Culprits

The radical supporters of Dreyfus are seeking to force the government to prosecute the many generals, colonels and high functionaries responsible for his condemnation. The amnesty law

BIG PLANS BY THE WHALERS
Pacific Company of This City to Greatly Enlarge Their Premises.
WILL ERECT NEW STATIONS
Other Vessel Similar to Orion Will Shortly be Employed.

The Pacific Steam Whaling Company of this city is having plans and specifications made for doubling its business, and as soon as this work is completed arrangements will be made to more than treble the business. It has grown to such an extent that the increase is necessary.
A second whaling station will be established before spring in Esperanza Inlet, Nootka Sound, with another whaling steamer similar to the Orion, now at the Sechart station making its base there. The next step in the improvement of the coast whaling industry will be the establishment of a third whaling station, with a third whaler making its base there, in Fitzhugh Sound, near Rivers Inlet, from where the whaler will cruise in pursuit of whales in Queen Charlotte Sound and adjacent waters.
When the Third Whaling Station has been established—and plans are now being drawn therefor at the instance of the officials of the company—it is understood to be the intention of the company to build or purchase a steam freighter to supply the various stations of the company on the British Columbia coast.
The necessity of such a steamer is evident when the amount of cargo shipped to and from the initial station at Sechart is noted. There are now eight carloads of barrels awaiting shipment to the whaling station, as well as coal and other supplies. Yesterday the steamer Tees brought 230

tons of whale products, and 200 tons was received a few days ago by the steamer Orion. With three whaling stations, the need of a special freighter is apparent. This has been the Record Week.
at the Sechart whaling station. A telegram received yesterday morning by Captain Spratt Balcom, the managing director, from Mr. Scaplen, the company's foreman at Sechart, stated that eleven whales had been taken from Monday to Thursday—one fin-back, one sulphur-bottom and nine humpbacks. The Orion was hunting when the steamer Tees left the whaling station, and was expected to return yesterday with more whales; in fact, the whalers confidently expected that not less than fifteen whales would be the figure for this week.
It is estimated that the eleven whales taken during four days of this week were worth in the neighborhood of \$10,000. This in itself gives some slight idea of the richness of the coast whaling industry, which is the latest to be added to the wealth-producing local industries. The steamer Tees, which arrived yesterday,
Brought 230 Tons of Whale Oil valued at \$85 per ton; 47 sacks of balena (whalebone), valued at \$430 a ton; and 17 tiers of tails, valued at \$40 a tier. The whole shipment, together with a shipment of whale products approximating 200 tons, was landed at the outer dock for shipment on board the steamer Stentor, loading for Glasgow and Liverpool.
The Tees brought news that on Wednesday the Orion made the best catch she has taken since being placed in service at the Sechart station. The Orion left port in the early morning as usual, and before noon had taken two large whales. The morning was a foggy one, and the whalers were unable to busy their mammals, as usual, on this account. The steamer put about with the two whales—one at either side of her bow. When the Orion was returning to the whaling station two other whales were sighted, a bull and a cow. The gunner hurriedly loaded and fired.
Killing the Bull Whale
The other refused to leave the vicinity, and the harpoon gun was loaded again and the other whale killed. The steamer returned to the station with four whales—two at the bow and two trailing astern.
A blacksmith who has been employed in making and altering harpoons at Norway whaling stations arrived in Victoria yesterday and will leave today for Sechart by the Tees to establish a blacksmith shop in connection with the station. Heretofore the

harpoons which were bent as a result of the struggles of the harpooned mammals, were brought to Victoria for repairs and straightened by local blacksmiths. A shipment of bent harpoons was brought up by the Tees yesterday, but these will be returned to the station tonight and will be repaired at Sechart by the Norwegian blacksmith who is just starting work.
Never Sent a Man to the Hospital.
During the Spanish-American War I commanded Company G, 9th Illinois Infantry. During our stay in Cuba nearly every man in the company had diarrhoea or stomach trouble. We never bothered sending a man to the surgeon or hospital, but gave him a dose or two of Chamberlain's Colic, Cholera and Diarrhoea Remedy and next day he was all right. We always had a dozen bottles or more of it in our medicine chest.—Orro Havill. This remedy can always be depended upon for colic and diarrhoea, and should be kept on hand in every home. For sale by all Druggists.

PROPOSED VISIT POSTPONED.
British Channel Fleet Will Not Visit Russian Waters.
St. Petersburg, July 13.—The visit of the Channel fleet to Russian waters has been postponed until a more proper time. The initiative in this decision came from Russia, which pointed out that the proposed visit had been welcomed with satisfaction by the Russian government, which saw in it an expression of sympathy for Russia on the part of Great Britain. Unfortunately, it is added, certain political parties in Great Britain and Russia fomented a sharp agitation with a view to connecting the visit with questions of Russian international policy.
The firm stand of Sir Edward Grey, minister for foreign affairs, brought the question back to its proper ground and it was appreciated here at its proper value.
Cordial telegrams have been exchanged between King Edward and Emperor Nicholas.

GAINED 25 POUNDS.
"I was much run down in health, could not sleep, was very nervous, and so weak that I could hardly get around. Some months ago I began using Dr. Chase's Nerve Food, and today I am pleased to say that I am completely restored to health. I have gained over twenty-five pounds in weight, sleep well and feel strong and healthy."—Miss Annie Evans, 39 Gottingen St., Halifax, N. S.

DUEL OVER THE DREYFUS AFFAIR
(Continued from Page One.)
protects them, but a movement is on foot to change this law for the purpose of reaching Generals Mercier and Gomez, Col. Dupuy and others who were instrumental in the persecution of Dreyfus.
The government newspapers declare that the affair is closed, but others, notably the Figaro and the Echo de Paris, report that fierce reprisals are about to begin. The Figaro, however, appeals to those who are prominent in obtaining a revision of Dreyfus' trial not to attempt to obtain vengeance.
The Echo asserts that the acquittal of Dreyfus means that politicians have seized the judiciary.
The prevailing tone of the press testimony to the scrupulous integrity of the court and hails its decision as a triumph of justice.

HOW'S THIS?
We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.
F. J. CHENEY & CO., Toledo, O.
We, the undersigned, have known F. J. Cheney for the last 15 years, and he has never failed to give us the best of his perfect honor in all business transactions and financially able to carry out all obligations made by him.
WALDING, KINNAW & MARVIN,
Wholesale Druggists, Toledo, O.
Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75 cents per bottle. Sold by all Druggists.
Take Hall's Family Pills for constipation.

GIRL'S BODY RECOVERED.
Utica, N. Y., July 13.—The body of Grace Brown of Otisville, who was drowned in Big Moose Lake yesterday, was taken to Frankfort by Coronado Coffin today and this evening was identified by Frank Brown of South Otisville as that of his daughter. Mr. Brown stated that the young man last seen in the company of his daughter was Chester Gillette of Cortland, and that they had been intimate acquaintances for six months. No trace of

the man has yet been found, although there are rumors that he has been seen at various places.
BROTHER IS COMMITTED.
Notorious Frenchman to Stand Trial For Forgery.
Vancouver, July 13.—Brother was today committed for trial at the assizes on a charge of forgery.
LAST COURT OF SEASON.
Brilliant Function Marks Royal Levee at Buckingham.

London, July 13.—King Edward and Queen Alexandra tonight held at Buckingham Palace the fourth and final court marking the close of the London season. There were eight hundred guests and the function lacked nothing in brilliancy or effect. In addition to members of the royal family resident in the palace, the Prince of Wales and the Duke of Connaught, who have been absent from recent courts, were present. The reception rooms were decked with white and mauve flowers, and the coloring of the dining hall was also mauve. King Edward has a few engagements in England and is expected to go to Marienbad early in August.
Tonight King Edward received the members of the sixth congress of the chambers of commerce of the empire at Buckingham Palace. The congress was entertained at a banquet at the Hotel Cecil. Lord Elgin, the secretary for the colonies, presided. Chancellor of the Exchequer Asquith, Lord Strathcona, the Duke of Argyll and other prominent persons were present.

The Doctor Away From Home When Most Needed.
People are often very much disappointed to find that their family physician is away from home when they most need his services. Diseases like cramp, colic and cholera require prompt treatment and have in many instances proven fatal before medicine can be procured or a physician summoned. The right way is to keep at hand a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. No physician can prescribe a better medicine for these diseases. By having it in the house you escape much pain and suffering and all risk. Buy it now; it may save life. For sale by all Druggists.

NEW RUSSIAN CABINET.
St. Petersburg, July 13.—The Associated Press learns from a reliable source that Emperor Nicholas has offered the premiership to Demitri Shoff but that the latter has refused the post on the ground that he is not a member of the majority party in parliament and that the only possible cabinet in the present crisis is one composed of constitutional democrats. Prominent constitutional democrats think the emperor will now be offered to Count Heyden, who though he has the sympathy of parliament will be unable to form a cabinet although scheduled for a place in the coming constitutional democratic ministry.

OVERTAKEN BY TRAIN.
Clarksburg, W. Va., July 13.—After a train had hurled its father and one sister to death from a trestle here tonight, and fearfully injured the mother and three other children, a nine months old baby of Elijah Norris of Uniontown, Pa., was found between the ties unhurt. The family was overtaken by a train, and Mrs. Norris, seeing that she could not reach the end of the trestle, placed the child between two ties and the next instant was thrown to the ground below. The mother and three children who were injured may recover.

REBELLION IN BRAZIL.
Reported That Insurrection Has Gained Huge Proportions.
London, July 13.—The Leader's correspondent at Lisbon says that according to intelligence received here, the insurrection in Matto Grosso, Brazil, is swelling to huge proportions.
The insurgents it is reported, have organized a large army and are marching on Rio Janeiro and already have captured several cities.
General Ribeiro with 40,000 federal troops has been sent against the revolutionists. Fearful carnage is reported, and the killed are said to be already more than 4,000.

HAMBURG LINER IN COLLISION.
Steamer Deutschland Fouls Pier at Dover and Is Docked.
Dover, Eng., July 13.—The Hamburg American line steamer Deutschland which left Hamburg yesterday for New York while leaving the Dover pier, collided with the Prince of Wales pier and twisted her stern. The steamer immediately anchored off the Admiralty pier to investigate the extent of the damage she had sustained, and it was found to be so great that she was unable to proceed and must be docked for repairs.

Agod Women's Home.—The following donations have been thankfully received at the Agod Women's Home during the month of June: Mrs. Goglia, cash and wrapper; Mrs. Rudlin, cash; Mrs. Munie, lettuce; Mrs. Wm. Grant, strawberries; St. Barnabas church, flowers; Baxter Bros. Macintoshes, patchwork quilt; Mrs. Wallace, copy shawl and dressing jacket; Mrs. Saunders, flowers; Miss Beaudlands, flowers; Tourist association, sandwiches and cake.

CZAR SENDS CONDOLENCE.
Russian Emperor Sympathizes With Widow of Dead Admiral.
St. Petersburg, July 13.—Emperor Nicholas today sent this despatch to the widow of Admiral Schoukoin: "I am heartily touched by the distressing news of the death of your husband. His loss is a great one to me and the fleet. I divide your misfortune and sorrow, which God strengthen you to support."

Veronesi, July 13.—The whole of the province of Veronesi is affected by excesses arising from the agrarian movement. The peasants are stirring everywhere and burning estates in Bobrovsk district. More than 20 estates having been burned and 300 head of cattle killed or driven off. In the Garansk district 2,000 peasants have started to pillage, and many estates have been burned. The trouble northward is increasing. In this vicinity 15 estates have been burned and destroyed. Troops have been sent to the disturbed districts.
Warsaw, July 13.—An attempt was made today to assassinate General Schowelsky, a member of the military tribunal. The general escaped without harm but his wife was wounded by two bullets.

Maple Leaf Outing Shoes

There are running Shoes, and running shoes, but none to equal those with the Maple Leaf Brand on the sole. They come in both Tennis and Oxford styles for Ladies or Gentlemen, Girls or Boys, and the soles of all are made from pure para gum rubber.

YEAR'S WORK OF TOURIST ASSOCIATION

A Brief Outline of Progress Made During Last Twelve Months.

EXPENSES INCURRED TO DATE

An Urgent Appeal For Further Financial Assistance Is Made.

An urgent appeal for help is now being made by the Victoria Tourist and Development Association in the way of contributions and donations for the purpose of helping that society to clear the cost of business transacted during this year. A large amount of labor has been expended owing to the arranging and installing of the industrial exhibit and changing from the old Tourist Association on the inauguration of the Hundred Thousand Club. While this extra work has been in progress very little notice has been given to the collection of expenses, with the result that at the present time help is asked, and every citizen is reminded that as the institution is maintained by their combined effort, his share is asked.

The management of the Tourist and Development Association is now in the hands of the most competent business men in the city, and is composed of fifteen of the most progressive and successful business men, and all expenditures are authorized by them as a whole. In fact, no liability is incurred without the sanction of the full board. After a liability is incurred the account is brought before the finance committee and passed by them and further recommended to the executive for payment before the check is actually issued. Therefore, the subscribers are assured that every care is taken that the money is devoted to the best interests of the city. The very complimentary references that have been made in the press of outside cities as to the vast amount of money expended in previous years, together with the known and tangible results that are apparent to our own citizens, testify to the fact that great care has been taken to make the money go as far as possible.

Last year the Tourist Association transacted a large amount of business

and spent approximately \$9000; but this year considerable more work has been done and the receipts hardly come up to the estimates. It is only right to point out also that about \$600 was spent in rearranging and repairing the premises made necessary by the addition of the permanent industrial exhibit.

Expenditures and Liabilities

Net balance of liabilities from last year	\$ 695 80
The printing of literature, including five thousand fine mailing cards; two thousand handsome illustrated posters in six colors; twenty thousand special circulars and one thousand poster cards distributed in every residence left standing in San Francisco and in all the refuge camps; fifty thousand illustrated four-page folders, over thirty thousand of which have been distributed; most of them from house to house in Seattle, Tacoma, Spokane and Portland; fifteen thousand illustrated envelopes; five hundred large sheet car signs in two colors; and fifty thousand twenty-four page illustrated booklets printed in two colors, the paper for this work weighing nearly four tons, and all sundry printing, etc.	2,410 00
The cuts and illustration for same	325 00
Rent of office, bureau of information, telephone, lighting, etc., for year	710 00
Day on literature distributed in United States, customs and express charges on literature, etc.	360 50
General advertising, including two whole pages in the Manitoba Free Press now appearing, one page Pacific Monthly, etc.	293 00
Traveling expenses in visiting over 18 cities and resorts in California, Utah, Oregon and Washington, and in superintending the distribution of literature in those states and the cities thereof	355 40
Cost of alterations in bureau of information and in exhibition halls to fit them up for their present purposes, made necessary by the addition of the industrial department	625 00
Salary of secretary, lady attendant, office boy, which covers all costs of preparing literature of every nature, representative sent to outside cities, superintendence of distribution of literature, etc., for year	2,100 00
Office expenses, stationery and office supplies	150 00
Sundries	100 00
Total	\$8,155 70
To meet the above liabilities, the expenditure already incurred, there is the following available revenue:	
Grant city council	\$4,000 00
Subscriptions from last year and 1905	137 98
Proceeds from entertainments	123 00
Proceeds from advertisements	500 00
Subscriptions promised 1906	1,750 00
Total	\$6,530 98

There is at present about \$1600 needed to meet the liabilities of this year, and soon there will be an increased expenditure of probably \$450 for the purpose of distributing the handbooks just received from the printer, in receiving and entertaining the delegations which are meeting in the city this summer, and it will further help to send a representative to the Winnipeg fair, a district which for advertising purposes is especially open to Victoria about this time.

GRAND TRUNK OFFICIALS BOUND TO KAIEN ISLAND

Sir Charles Rivers Wilson and Sir Wilfrid Laurier Coming in August.

Sir Charles Rivers Wilson, president of the Grand Trunk railway; Sir Wilfrid Laurier; Mr. C. M. Hays, president of the Grand Trunk Pacific railway; Mr. Frank W. Morse, general manager of the directors of the company, will visit Prince Rupert, the Grand Trunk Pacific terminus on Kaien Island, the latter part of this month or early in August, says the Vancouver Province.

Great preparations are now being made at the northern point for the reception and accommodation of the distinguished party, which may include a number of federal politicians.

Owing to the fact that there is no residential accommodation at Prince Rupert as yet, the Grand Trunk Pacific has leased the old hospital building at Metlakatla, and it is now being renovated and furnished for the use of the chief officials of the company during their stay in the North.

Metlakatla is an Indian village lying quite close to Kaien Island, and the hospital there has been occupied by Dr. Tremaine, from whom the building was rented about two weeks ago. Information regarding the preparations being made to receive the Grand Trunk Pacific officials in the North was brought down by the C. P. steamer Amur, which reached port early yesterday morning.

May Run Up Skeena

It is probable that on the arrival of the party in Vancouver from the East the Canadian Government steamer Quadra will be in waiting here to take its members north. If there is not sufficient accommodation on the Quadra, the fisheries cruiser Kestrel may be pressed into service to take care of the overflow.

It is reported in the North that arrangements are now being made to show the officials some of the country in the vicinity of Kaien Island, and possibly a trip up the Skeena river may be arranged for their benefit. As regards this proposal, everything depends on the stage of the water in the river. If it is too high for easy navigation the trip will be cancelled.

TO BUILD RAILROAD.

A Broad Gauge Line Opening Up the Kootenay District.

J. D. McGoldrick returned to Spokane yesterday morning after a lengthy consultation with T. G. Procter, who represents the Royal Lumber company—the McGoldrick concern—in this city, says the Nelson News.

Mr. McGoldrick is building a broad gauge railroad, not of any great length, but of great importance not only to Nelson but to the mining and agricultural interests of the district. The new road runs in from Crawford bay, up Crawford creek to Hazelton and Carleton creeks where Mr. McGoldrick will shortly take out from one hundred to one hundred and fifty million feet of the finest lumber in British Columbia. The railroad is primarily constructed for the purpose of bringing out the lumber, which will be brought down to Crawford bay, dumped into the Kootenay lake and towed to this city, where it will be cut up at the Royal Lumber company's mill, to be erected at Tramway park. The railroad will be about 12 miles long. Mr. Goldrick already has the steel and a Shay engine, both being in use in the States at present but both of which will be moved up to Crawford bay when the new line is graded and ready.

Mr. S. Drury has completed a thorough survey of the whole line and part of the road is already graded, some 16 men being now at work. The grading of the whole line may be commenced this fall, or at any rate in the spring. As the company propose to erect the largest and most up-to-date sawmill at the Tramway park it can readily be seen what an important addition the whole undertaking will prove to the lumber industry in this city.

Mr. Procter in speaking of the new railroad said yesterday: "Quite apart from its importance from a timber standpoint, the new road will run into and open up one of the best mineral sections of the Kootenay, that has been held back for years by the lack of a road. The Silver Hill mine, which will be tapped by the McGoldrick road, has already shipped out many hundred tons. Then there are the known iron mines that have been waiting for transportation facilities, and many other properties which have been turned down by capitalists in the past because there was no means of getting the ore out, all of which will now be available. Beyond any question the new road will act as a great inducement to capitalists to take up properties in the Crawford creek section. There are many fine ranches at Crawford bay and thereabouts today so that I think the coming of the new road will brighten matters up considerably in that section, and, of course, the people will reap a distinct benefit. I think Mr. McGoldrick should be encouraged in every way with his enterprise which promises so much for a district that has practically been tied up hitherto."

The funeral of the late Mrs. T. J. Dunn of Vancouver takes place today at 2 p. m. from the parlors of W. J. Hanna, and at 2:30 at St. Barnabas Church. Right Rev. Bishop Perrin will conduct the services.

The "Iroquois" is the first and only passenger boat that goes through the picturesque Iroquois channel the Pender Island canal and the Thousand Islands of the Gulf. Take a trip next Sunday and you will be delighted. Train leaves V. & S. station, 9:45 a. m.

Annual Picnic—St. Barnabas Church Sunday school will hold their annual picnic on Wednesday, August 1, at Hazen Bay (Victoria Terminal Railway). Trains will leave the market depot at 8:15 a. m. and 3 p. m.; and returning will leave Sidney at 6:15 p. m. Dinner and tea will be provided for all at a nominal charge. The entertainment will commence with a cricket match (one innings) between the rector's eleven and Mr. James Dickson's eleven. This will be followed by a programme of sports for Sunday school children. There will be coconut throwing and other games. Sweets and ice cream may be obtained on the grounds. It is hoped many will take advantage of this day in the country and so help to provide a happy day for the little folk attending St. Barnabas Sunday school. Tickets may be obtained from the Sunday school children and teachers and also from Mrs. P. K. Turner, Solo Bazaar, Fort Street. Every ticket sold will help to pay for the children, who of course go free.

Cured Her Drunken Father.
This young lady says:—My father often promised to stop drinking, and returned to it worse than ever. After a terrible spree, he said, "I'll no more drink." I decided to give him the Tasteless Samaria Preparation, and did so in his coffee, tea and food entirely without his knowledge. One package removed all his desire for liquor. It is now 15 months since we gave it to him, and we feel sure the cure will last."

FREE SAMPLE and pamphlet, giving full particulars, testimonials, and a list in plain sealed envelope. Correspondence secretly confidential. Enclose stamp for reply. Address: THE SAMARIA REMEDY CO., 23 Jordan Street, TORONTO, Ont.

Also for sale by Hall & Co., Cor. Yates and Douglas streets.

SEVERE KIDNEY TROUBLE.
Mrs. Geo. Lawson, Concession, Ont., writes: "Dr. Chase's Kidney-Liver Pills completely cured me of constipation, rheumatism, stomach troubles and a very severe kidney trouble after years of suffering. I am now sixty-eight years of age, and very grateful for what Dr. Chase's Kidney-Liver Pills have done for me."

PUBLIC SCHOOLS

DESKS.
SEALED TENDERS, superscribed "Tender for School Desks," will be received by the undersigned up to the 20th July, 1906, for supplying and delivering the following school desks ready for shipment to places to be hereafter designated, to the order of the Department at Vancouver or Victoria, B. C., on or before the 1st September, next:

DOUBLE DESKS.	
Size No. 2.....	100
Size No. 3.....	150
Size No. 4.....	200
DOUBLE REARS.	
Size No. 2.....	50
Size No. 3.....	50
Size No. 4.....	20

The desks shall be of the most recently approved design. Sample of desk to be submitted to the Department.
No tender will be entertained unless accompanied by an accepted cheque on a chartered bank of Canada, payable to the undersigned, in the amount of one hundred and fifty (\$150) dollars, which will be forfeited if the party tendering declines to enter into contract when called upon to do so, or if he fails to complete the contract. Cheques of unsuccessful tenderers will be returned upon signing of contract.
The Department is not bound to accept the lowest or any tender.

ANNOUNCEMENT.

Yesterday negotiations which had been in progress for some days in reference to the controlling interest of the Colonist Printing and Publishing Company held by Messrs. J. A. Lindsay, C. E. Pooley and A. G. Sargison, who reside from the directorate, were concluded. Mr. J. S. H. Matson will be managing director and Mr. R. E. Gosnell, editor, general manager and assistant managing director. The Colonist will continue as formerly to support the Liberal-Conservative cause.

BOARD OF TRADE.

Yesterday afternoon's annual general meeting of the Victoria Board of Trade was an exceptionally important one, in the sense that official statements were made showing the remarkable commercial progress of the province during recent months. The seventh annual report submitted by Secretary Elworthy is a most excellent and comprehensive review of the industrial progress since the last annual general meeting; and the cold statistical information which is embodied in the same indicates quite conclusively that this is indeed British Columbia's "growing time." In another column this report is published, and it will well repay careful perusal by all Colonist readers. Inhabitants of Vancouver Island will of course be particularly interested in the theme of the bridging of Seymour Narrows, in order that Victoria and other Island points may have all-rail connection with the transcontinental systems on the Mainland; and the railway committee of the board is to be congratulated on the splendid case made out for this enterprise. Additional interest was lent to yesterday's meeting by the presence of Hon. R. G. Tait, minister of finance, and Hon. R. E. Green, minister of lands and works. The remarks made by the former respecting the financial status of the province must prove eminently satisfactory; and it is gratifying to note that approval of the minister's remarks was not lacking from those members of the board who are politically opposed to the policy of the present provincial administration. The statement made by Hon. Mr. Green that plans are in hand for a comprehensive survey of the lands of the province was a most welcome announcement; and the impression was general that the showing officially made as to the outlook was extremely satisfactory.

CANADA AS A PAN-AMERICAN.

Under the above caption the Mexican Herald of a recent date has a rather interesting editorial, based upon some observations made by a writer in the National Review, of London, England, with respect to the position which Canada will take, in the near future, in regard to Pan-American affairs. The Herald—whether rightly or wrongly, we are not prepared to say—treats the article in question as being inspired in high Dominion quarters, and terms it "an interesting disclosure of the ambitions of Canadian statesmen." It is possible that most Canadians, enjoying a nearer view of these high matters, may entertain very grave doubts as to whether even a small proportion of those gentlemen now at the helm in Dominion affairs entertain any such lofty ideals as those attributed to them by the National Re-

view, writer. For example, he says that Canada in the near future is to serve as a "mediator, a vital link" between the British Empire and the United States. This would seem to the average observer to be one of two things—either a reversal of present conditions, or the creation of a totally unnecessary office. But this London writer goes very much further as he proceeds to reveal his views of Canada's immediate future. He states in practically so many words that the Dominion is to act as the arbitrator between the United States and the growing powers of Latin America, "who wish to see Canada represented at the Pan-American Congress." In other words, as The Herald remarks, it is the aspiration of Canada, according to this writer in the National Review, "to be a sort of permanent peace tribunal for this hemisphere." And the Mexican journal goes on to remark, with what may be either sincere admiration or gentle satire, that the role above proposed "is one that does credit to the rising ambitions of Dominion statesmen, and it also illustrates their humanitarian leanings." It then proceeds, after reminding its readers that discussion on the subject is at present purely academic, Canada being still a part of the British Empire as regards international affairs, to comment upon the article in the National Review with no small degree of favor. Now, such is the present trend of trade and commerce that, of all Canada, the people of the Pacific Coast are perhaps the most vitally interested in the establishment of close and friendly mercantile relations, not merely with Mexico, but with the Latin-American countries which lie to the south of the domains of President Diaz. The expressed sentiments towards Canada, therefore, of so influential a publication as the Mexican Herald are not to be lightly regarded here. And it is with these sentiments rather than with the—as yet—political dreams of the London writer which caused their expression, that the people of the Dominion are concerned. Commenting, then, on the fact that Canadian interests are being largely extended at present, not merely in Mexico, but in the West Indies (Cuba especially), Brazil, etc., The Herald makes this significant and flattering observation: "Down here we all welcome the entrance of Canadian money and brains." The Mexican journal then turns to the National Review's expressed opinion that this extension of Canadian enterprise will soon give the Dominion a right to be heard in the Pan-American conferences, and points out that here is indicated a new phase and complication for the Monroe Doctrine. With a partial perception of this fact, "some of the papers in the United States are blowing coldly on this proposition," observes The Herald, "and are advising Canada to wait a generation or two and grow to larger proportions before attempting to win in these high matters. But Canada, we may remind some of these critics, has more people within her borders than Argentina, far more than has Chile." Two solid facts, these, it is well to observe, though far too seldom realized by many Canadians themselves. The Herald concludes a very flattering review of Canada and her prospects with the following amusingly-worded—but, it may be hoped, just—appreciation: "Canada will not be a jingo, nor will she covet her Latin-American neighbors' vineyards. She will speak words of reconciliation and apply the balsam of healing to international asperities. Lord love her, let her come into the circle." Whatever may be thought of the political side of this argument, there can be no mistaking the cordial feeling displayed towards Canada and Canadians by Mexico's leading journal, which may be presumed to voice public sentiment in general. And it is well that the existence of such a feeling should be as widely advertised in Canada as possible.

ICELANDERS WELCOME.

The announcement that a colony of Icelanders is to be established at or near the mouth of the Skeena River must be gratifying news to all who take an interest in the development of British Columbia. The Icelanders have proven themselves to be thrifty, industrious and progressive, in the best sense of the word, wherever they have cast their lot in the Canadian West. The addition of a large number of these people to the population of the province will, therefore, prove an immediate benefit and a material help in the future. The Iceman quickly adapts himself to his new surroundings, he is ever on the alert to utilize new methods, and he easily assimilates with his neighbors, dropping his old world ideas and customs, entering heartily into the public life of his adopted country and making common cause with his fellow citizens for its advancement. Our western coast is a splendid field for the Iceman. Its deep inlets and bays will be to him an idealization of his native land, whose rugged, barren shores are reproduced here clothed in verdure and free from the extreme cold and biting gales of the northern Atlantic. He will find himself at home in the fishing grounds and in the fertile valleys, and, thanks to the better climate, will be able to make a comfortable living and an easy future with much less exertion than his native land demands to secure the most meagre existence.

Descendants of the Vikings, who once ruled the ocean, the Icelanders have preserved their traditions and their love for literature. An illiterate Iceman is something unknown, and among the most humble class are found scholars and poets of no mean order. Given the advantages of

THE HAIRS STAY IN

Our stock has been augmented by the famous "SILVER DRAWN" English Tooth Brush. The hairs are permanently secured by SILVER WIRE and the brush is backed with SILVER WAX.

SHOTBOLT'S, PIONEER DRUG STORE, JOHNSON STREET

modern education, these people quickly develop into leaders in the learned professions, law, medicine, divinity and science, as witness the wonderful progress they have made in the space of one generation in Manitoba.

The government will be justified in extending every aid and encouragement to this advance guard of Icelanders, for despite the failure of other colonization schemes attempted in British Columbia, the Colonist feels confident that the establishment of an Icelandic colony will result in an unqualified success.

A GLORIOUS VICTORY.

Right minded people all over the world will rejoice with Dreyfus in his triumph over the diabolical plotters who sought his utter ruin. Not content with condemning their victim to a living death on L'Isle du Diable, these miscreants tried to destroy in his person the prestige and standing of the Jewish people of France. From the moment he joined the army, into which he graduated with highest honors, Dreyfus was marked as a victim by the anti-Semites of the army. The idea of his superior officers at that time was to exclude Jews from the higher military grades, the same as had been done in Germany. Despite the strenuous efforts of leading generals to bar him from the army staff his brilliant qualities defeated all opposition and won him a place in the war department. Here he was surrounded by enemies and treated as one in whom no confidence could be reposed. His every act, however trivial, was regarded as a step in the deep laid plans of a traitor, and every man in the department constituted himself a spy to watch the movements of the object of their hatred. The fact that he was a Jew was quite sufficient to convince his fellow officers of all ranks that he was necessarily plotting against the Republic and when the crisis came, in the discovery of the Esterhazy treason, the resemblance of his handwriting to that in the celebrated dossier, was regarded as sufficient proof of his guilt.

Colonist readers remember the trial of the alleged traitor, his degradation and sentence to Devil's Island and the subsequent battle of right, carried on against fearful odds by the heroic Picquart—a brave soul who stands out in glorious relief against the background of infamous intrigue, forgery and perjury in which Henri, Paty du Clam and Esterhazy were the prominent figures. It is meet and just that Picquart should share in the victory and complete vindication of his friend Dreyfus, and the announcement that he, too, is restored to his army rank will be received with satisfaction.

Motor buses are creating new problems in London street traffic.

Where is the mania for murder in the United States to end?

Some idea of the immensity of this season's grain crop may be formed from the statement that a single firm in the little town of Yorkton, Sask., has placed an order in the east for five car loads of binder twine.

Many who look upon the treeless plains of Saskatchewan as a sub-Arctic region will be surprised to learn that one fruit grower, ten miles north of Pense, has an orchard of 5,000 flourishing trees. The apples produced are of excellent quality and are cultivated from stock imported from Northern Europe.

Mr. J. A. Mara was yesterday unanimously elected as president of the Board of Trade. This was a well merited honor. Mr. Mara has been one of the most active members ever since he took up his residence in the city, and has rendered valuable assistance on all possible occasions. Mr. Pauline, as vice-president, was also a popular selection. He was one of the hardest workers in the late council and his promotion is well deserved. There is a good working council this year, and we may look for results equal to, if not a little better than, those of last year.

The chemical fact that oil will not mix with water has been very cleverly utilized by a genius in the United States. This inventor knew that water flows more rapidly through a pipe than oil and experimented for a long time to devise some contrivance by which a pipe conveying oil could be lined with water so as to give the oil a swifter passage. After many unsuccessful attempts to put his idea into practical form he hit upon the simple plan of rifling the pipe, the same as the modern military weapon. Thus by introducing a small quantity of water with the oil a perfect lining of water is formed. The rifled bore gives a rotary motion which causes the water to adhere to the pipe at all points of its circumference and the smooth wall of water carries the oil to its destination many times faster than it would travel unaided.

LETTERS TO THE EDITOR.

[The Editor does not hold himself responsible for views expressed by correspondents.]

THE WATER PROBLEM.

Sir—In dealing with the question which is so vitally connected with the health, safety, beauty, present and future

growth of our fair city of Victoria, we should be more than careful to avoid the mistakes we have made in our earlier history. Every summer demonstrates the fact that the Elk lake supply is insufficient in quantity and quality. Therefore no scheme should be advocated by council or people which does not give an ample supply of good, pure water for at least 100,000 persons, and at such an elevation to assure the comfort and safety of the highest residence in Victoria. From what we know of the Goldstream water supply and its cost, we should rule that scheme out. It will pay us to build deeper and stronger than any Goldstream proposition. Shavanzan lake should be our source of supply. Bring the pipes down the E. & N. grade, even at a price of one million more dollars than the Goldstream scheme. And so give to the future generation of Victoria pure water and plenty of it, for which they will be more than willing to pay their share.

BEAVER.

OF INTEREST TO FISHERMEN.

Sir—I have been often asked when travelling around, where the best salmon fishing is to be had, and it has occurred to me it would be of interest to your sporting contributors if you would put under the head of "Sporting" a note somewhat like the enclosed, as is done in The Field and other papers in the Old Country. In the meanwhile it would be useful to many sportsmen if at the end of the week you would put in a note to say that "salmon are running plentifully in Active Pass and that boats (free to visitors) are getting large takes."

Both the hotels, I believe, have advertisements in your paper. I am living on Galiano, just opposite the Mayne Island hotel, and would be pleased to put any brother sportsman into the way of getting the best fishing, of course simply for the pleasure of doing so!

I write this, as it seems to me a pity that there are not more people to enjoy the excellent fishing.

I would send you in a list of fish caught if you agree with my suggestion. If so, let me know what day to post it.

I may add, I have no interest in the matter at all, other than providing sport, as I have come out from England simply for sport.

E. BUCKLEY.

Galiano, B. C., July 13, 1906.

YOUTH'S VITALITY SAPPED AWAY

Your child looks poorly, is tired and fretful. You would like this boy or girl to be more robust, more energetic and vivacious.

The "something" that is wrong is simply this. Stomach and bowels need attention, constipation and indigestion must be relieved, new life and vigor are required in the blood, slight assistance is needed for the kidneys and liver.

Go back to the old standby. Nothing is so effective as Dr. Hamilton's Pills. They put new life into young folks as well as the old ones. Every child should use this medicine regularly because its benefits are not to be had in any other way. Full boxes 25c, at any dealer, or by mail from N. C. Polson & Co., Kingston, Ont., or Hartford, Conn., U.S.A.

VALUABLE FARM PROPERTY AND STOCK FOR SALE.

Tenders will be received by the undersigned up to the last day of September, 1906, for the purchase of some under-mentioned farm property and stock belonging to the estate of the late Richard Hooey, of Lillooet, B. C. Tenders may be for the whole or any part of the property, as below listed. The highest or any tender not necessarily accepted.

Farm about six miles below Lillooet, consisting of about 680 acres, partly under cultivation. Farm abundantly supplied with water.

Three hundred and thirty-seven acres of farming land situated on Pavilion Mountain, near Clinton, B. C.

About 250 acres of pasture land on Pavilion Mountain, near Clinton, B. C.

About 50 head of cows with calves.

About 50 head of yearling stock cattle.

About 180 head of stock cattle two years old and over.

Eight head horses, farm machinery, wagons, and general farm effects.

Tenders should be addressed to MESSRS. SMITH & HOOY.

Executors R. Hooey Estate, Lillooet, B. C.

The Hot Wave.—In the opinion of
many Victorians, the hottest day
of the present season was yesterday,
the temperature during the afternoon
being particularly oppressive, though
the thermometer only registered a
little over 80 degrees in the shade.

White Pass Dividend.—London ex-
changes just to hand contain the in-
formation that the directors of the
White Pass & Yukon Railway Com-
pany, Limited, have declared an in-
terim dividend of 2 per cent. (4s per
share) on account of the year ended
June 30.

Esquimalt Trustees.—This morning
at 10 o'clock a meeting of the Esqui-
malt trustees will be held at the
Lampson street schoolhouse, for the
transaction of important business. A
full attendance of all interested is
requested.

Will Read Paper.—"Victoria as a
Place of Residence" will be the title
of a paper to be read by Mayor Morley
by request at the annual convention
of the Union of Canadian Municipal-
ities, which will be held from the 14th
to the 16th of August at Halifax.

Auto Men's Mecca.—Says the Na-
namo Free Press of Thursday: "Mr.
Ridley, a former well known Dawson
lawyer, now of Vancouver, came up
from Victoria last night with a party
in an automobile. They left for the
West Coast direction after dinner.
They say the roads from Victoria are
in magnificent shape. The city is cer-
tainly booming it up in the automobile
line. Another big machine from Bel-
tingham is expected on the Joan to-
morrow, the owners hearing of the ex-
cellence of the roads in this vicinity."

Tyee Smelter Returns.—A statement
just issued by the Tyee Copper Com-
pany shows that their smelter ran 15
days in June and treated 2123 tons of
Tyee ore, giving a return, after deduc-
tion of freight and refining charges, of
\$36,630.

Back From Hatchery.—Provincial
Fishery Inspector J. P. Babcock has
returned from a visit to the hatchery at
Saton lake, near Quesnel. Everything
was made ready for the coming season's
hatching, the building and appurtenan-
ces being in perfect order. The two men
who remain constantly on duty have
carried out their work successfully, and
the inspector stated this morning
run of fish will commence within four
or five weeks.

Whales in Abundance.—It was reported
from the Sechart whaling station
yesterday morning that the weather has
been fine for several days and the catch
of whales has been very large. In all
eleven were killed during the past week,
nine being humpback, one sulphur and
one finback. This is the record catch
since the whaling station started.
Those operating at the station say that
they hope to keep up the record for the
next two months.

Indians Excited.—A large number of
Indians at Sitka have been roused to
great excitement by the report that a
Kootha or ghost of one of the drowned
sealers is haunting the island north of
that place. A hundred dollars reward
has been offered to the person who cap-
tures the Kootha. Two parties left
town with guns and ropes and among
them are relatives of the drowned seal-
ers. They have been cautioned by the
authorities not to shoot any one, but
the gravest fear is felt as to the result
of the expedition.

Y. M. C. A. Excursion.—This after-
noon the excursion among the islands
by the steamer City of Nanaimo prom-
ises to be well attended. The vessel will
leave the C. P. R. wharf, Belleville
street at 2:30 o'clock, instead of 2 as
previously announced. A stop will be
made at Fulford harbor, Salt Spring
Island. An excellent musical programme
will be rendered both going and return-
ing by an orchestra conducted by Jesse
Longfield. Attention is called to the fact
that the general fare has been fixed at
50 cents, children half price. The man-
agement of the Y. M. C. A. guarantee
all attending a pleasant time.

Park Features.—Chairman Shrews-
bury, of the Seattle park commission,
is in the city for the purpose of inter-
viewing His Worship Mayor Morley in
regard to the "possibility" of effecting an
exchange of some of the many different
varieties including the wild stock of
Woodland park for a number of the
swans which form one of the features of
the Beacon Hill recreation grounds.
While the former boasts of a splendid
herd of the best of the Pacific
Coast, it has no swans. While in this
city Commissioner Shrewsbury intends
looking into the method of park man-
agement here thoroughly in order that
any valuable hints may be utilized in
the further improvement of Woodland.
He hopes also to take back with him
one or two swans from Beacon Hill.

Colfax Rebekah Lodge.—The officers
of Colfax Rebekah Lodge No. 1 were
duly installed by Acting D. D. G. M.
Sister Minnie Dempster, assisted by
the usual staff of grand officers:
N. G. Sister Ruby M. G. Bird; V. G.
Sister Pauline Lange; Rec. and Fin.
Sister Frances A. Walker, P. G.;
Treas. Sister Sarah C. C. Chap-
lain, Sister Jennie Grant, P. G.; R. S.
N. G. Sister Helen McNeill, P. G.;
L. S. N. G. Sister Jessie D. Fairfull;
R. S. V. G. Sister Mary Riddle, P. G.;
L. S. V. G. Sister Mary Clement; Con-
ductor, Sister Minnie Dempster, P. G.;
Varden, Sister Mary A. Phillips, P. G.;
L. G. Sister Alice Taylor; O. G. Bro.
W. L. L. G. Sister Elizabeth
McAfee.

Oak Bay Election.—Yesterday at
noon, before the returning officer, J.
D. Virtue, the council and school trust-
ees in the new municipality of Oak
Bay were duly elected—all by accla-
mation. The following names were
put in nomination: For reeve, W. E.
Hewett; for councillors, P. M. Batten-
bury, F. B. Penbenthorpe, John Mc-
lelland, William Noble, Arthur E. Haynes
and William Henderson. This con-
stitutes the council, which were duly
declared elected. The following five
school trustees were elected by ac-
clamation also: Dr. O. M. Jones, H.
F. Hewett, Mrs. J. Herrick McGregor,
E. J. Henshall and Mrs. Fleming.

Confirms Chicago Exposures.—A
former employee of the Chicago stock
yards has arrived at Nanaimo from
Chicago. He declares the exposures
in "The Jungle" do not begin to tell
of the horrible practices of the Chi-
cago meat packers. He worked for
two years in the stockyards and was
forced to quit from sheer disgust of
the methods employed. It was a
common occurrence to see diseased
cattle driven into the yards, so far
gone that they had only a few hours
to live. These were killed and left
for hours on the ground, after which
they were converted into the canned
product. The sale of Chicago canned
goods here, according to local dealers,
has fallen away to almost nothing.

Nanaimo Coal's Fame.—G. A. Keefe,
Dominion government engineer, with
headquarters in Vancouver, was in
Nanaimo recently. Mr. Keefe has a
very high appreciation of Nanaimo
coal, from his position having every
opportunity of witnessing its value.
Nanaimo coal, he says, is now
being supplied the government boats
is far superior to any coal that the
government has ever received from
Nanaimo. If the mines continue to
supply the class of coal that they are
now doing throughout the province,
the mines will create a very heavy
demand for its product. Engineers
of government vessels are always an-
xious to get Nanaimo coal, for they
recognize it to be far superior to all
other coal supplied them.

Mining Deal Pending.—A deal involv-
ing the Alpha, Beta, Black Bear and
Blue Grouse copper claims on Vancou-
ver Island is pending and will be com-
pleted within the next twenty days, says
the Nanaimo Herald. Through Messrs.
F. G. Ames & Company some New
York capitalists have obtained the op-
tion of purchasing the claims for \$100,
000. The ore which has been assayed
was taken from the surface and runs
\$34 to the ton in copper. The expert who
examined the mine for people who hold
the option on the claims, says that the
richest he has seen, and that the main
body of ore will average 23 per
cent. copper. One also carries gold and
silver in small proportions. If the New
York men buy the claims, a smelter
will be erected to treat the ore at the
mine. This will be easy to do as the
ore has been pronounced self-fluxing by
the assayer.

Icelandic Colony.—A large Icelandic
colony will shortly be located on one of
the islands at the mouth of the Skeena
river. Hans Hansen will leave for the
North on August 1st with a party to in-
vestigate the district and decide upon a
suitable site for the colony. It is hoped
to be able to secure the land in adjacent
sections, but, if not, as many as possi-
ble will be located in one place. He es-
timates that the population of the colony
will be about 350 when the first draft
of settlers arrive, to be largely increased
as soon as conditions warrant it.

Big Sawmill Planned.—Cumshqua In-
let, on the east coast of Moresby island,
one of the Queen Charlotte group, is the
latest point at which it is announced a
large industrial enterprise will be in-
stituted. A syndicate, headed by John
Moore, of Seattle, a veteran mill owner
of the Sound, will erect a sawmill with
a capacity of at least 100,000 feet per
day at the point mentioned as soon as
actual railway construction commences
near this coast. This company has al-
ready secured ample timber limits.
Forty square miles, or 25,600 acres,
have been acquired from the provincial
authorities, and the ample capital be-
hind the men interested is a perfect as-
surance that the industry will be a large
and permanent one.

Dog Stealing.—T. Fletcher, of Fletcher
Bros.' music store, is mourning
the loss of his fine English setter dog,
which he has advertised for elsewhere
in this issue, offering a reward for the
recovery of same and at the same
time issuing a warning against the
detention of the dog by any person.

Rapid Travelling.—A prominent sol-
ditor of this city who has been to New
York returned yesterday morning on
the Princess Victoria. He made the
journey from Victoria in four and a
half days via the Northern Pacific's
"North Coast Limited" train. This is
the fastest time made by any line
across the continent.

Y. M. C. A. Excursion.—The 50-cent
return rate should insure a bumper
crowd on the Y. M. C. A. excursion
on the steamer City of Nanaimo this
afternoon. The steamer will leave the
C. P. R. wharf at 2:30, sailing through
the Gulf Islands and reaching Fulford
Harbor, where she will make a short
lay-over, thus giving excursionists an
opportunity to have lunch on shore, do
some fishing and view the beautiful
surroundings.

YEAR'S WORK OF BOARD OF TRADE

(Continued from Page One.)

sponse to the chairman's invitation to address the meeting. In his opening remarks he said that he was glad to have the opportunity to meet the members, although it had not been for a misunderstanding he would not have been able to do so, as it was understood that the should be on the mainland, and consequently he had not gone fully into the report and was unable to deal with it at length. He congratulated the board on the report and that they were able to make so splendid a showing. The recommendations were not only for Victoria and Vancouver Island but also for British Columbia as a whole and if carried out would result in a great benefit to the whole province. He was of the opinion that when the report was read the citizens of the province would thank the British Columbia board of trade of Victoria for the report. He said that the signs of prosperity were not wanting in any section of the province and he looked for a large influx of both settlers and capital. He was sorry to say that in the past the government had not a sufficient fund to send out survey parties to lay out the province as they would desire, but it was not for the lack of any desire but for the lack of funds. This year he had received a larger grant, and the surveys would be made to a much larger extent than before. He stated that at the next session they would ask for a larger grant and in this manner be able to obtain not only information, but have the surveys made correctly, and when information was asked for they would be able to supply it. Regarding the Victoria harbor question he said that Laurel Point was still a part of the domain of the province, although the Dominion had asked to purchase it. They had told the Dominion government that unless they were ready to do something with it that they would have to pay for it. If the Dominion government was ready to expend money on the piece of property and show that it would be an improvement to the harbor, he was of the opinion that his colleagues would hand it over without cost. He was pleased to see the interest that was taken in the harbor and if it were continued and driven home by the province, a great benefit and the harbor of Victoria would become one of the finest on Vancouver Island. He said in reference to the sale of land that the applications were increasing rapidly and the people were commencing to realize the importance of the land and if continued would mean a great benefit to the province. He joined with Mr. Tatlow in wishing the board every success in the work they had undertaken, and hoped that they would continue to deal with the important subjects as they have in the past. (Applause.)

C. H. Lagrin moved a vote of thanks to the ministers for being present. In doing so he said that the remarks by the hon. gentlemen were very pleasing, especially that of Capt. Tatlow regarding the financial position of the province and he thought that it should be spread broadcast throughout the country. He also referred to the their remarks regarding Victoria harbor, and hoped that the next time the ministers addressed the meeting that something had been done. J. A. Mara seconded the motion and in so doing said that although the reports were said to be more factual than provincial. He was pleased to see the ministers take so much interest. The resolution was carried and loud applause.

The scrutineers presented an interim report showing that P. A. Pauline had been elected vice-president.

Mr. Pauline, in acknowledging his election thanked the members for the responsibility that they had placed upon him and said that he would endeavor to assist the board to the best of his ability.

The auditors reported that they had examined the accounts of the board and found them to be correct. The balance to the credit of the board in the Canadian Bank of Commerce on June 30th was \$613.78 from which there has been deducted \$143.98 for outstanding accounts, leaving a balance of \$469.80. The balance was correct and they were requested to point out that \$500 had been transferred from the current account to the savings department of the Bank of Commerce. They also expressed their appreciation of the manner in which the secretary had kept the books and accounts of the board. The report was adopted.

Alex. McDermott, and Thos. R. Whitely, manager of the Royal Bank of Canada, were elected as members of the board.

Norman Hardie, J. E. Church and W.

Beecham's Pills
Sold Everywhere. In boxes 25 cents.

A. Lawson were appointed auditors. The complete list of new officers is: President, J. A. Mara; vice-president, P. A. Pauline; council, R. P. Butchart, Geo. Carter, Capt. J. G. Cox, Jas. Foreman, Richard Hall, D. R. Ker, Simon Leiser, C. H. Lagrin, T. W. Paterson, S. J. Pitts, J. J. Shallerross, R. H. Swinerton, H. B. Thomson, C. F. Todd and H. G. Wilson.

Board of arbitration: V. Bodwell, Geo. Carter, Capt. J. G. Cox, Jas. Foreman, Geo. Gillespie, Richard Hall, Norman Hardie, C. A. Holland, S. Leiser, C. H. Lagrin, T. W. Paterson.

The president's report is as follows: "Gentlemen: Your officers beg to submit the following report of the proceedings of the board for the twelve months ending 30th June, 1906."

Seymour Narrows.—In October last a special committee presented to the royal commission on transportation the memorial which you addressed to that body, a copy of which is hereto appended, and incidentally reported:

That Vancouver Island contains an area of about 16,000 square miles; That much suitable timber of the highest class and mostly in great quantities is everywhere to be found;

That copper and copper-gold ores are distributed over a very large area, that coal is extensively mined and that iron and lime have been discovered within easy distance of deep water;

That on Vancouver Island apples, pears, cherries, plums, grapes, and strawberries and other small fruits grow to perfection. Peaches and grapes do well in some localities.

That it is believed that at least one-third of the island can be utilized in some way in connection with agriculture.

Your memorial dealt with the harbors on the west coast of Vancouver Island suitable for ocean borne commerce.

These matters were referred to in an endeavor to impress the commission favorably with the board's desire that Vancouver Island should be connected with the mainland of British Columbia by a railway bridge in the vicinity of Seymour Narrows, and after a review of all the facts the commission recommended:

"That further and exhaustive exploration and survey be made in order to find the best route from the plains of Alberta to an ocean port on the west side of Vancouver Island."

"That in case of the building of a bridge at Seymour Narrows or elsewhere connecting the mainland of British Columbia with the island of Vancouver, such bridge and the approaches thereto, and the land on both sides of the water running back from same, such distance as may be deemed reasonably necessary to allow of free access thereto, be owned and controlled by the government of Canada, with the view of according equal rights on and over such bridge and its approaches, to all railways desiring to use it."

The board followed up the report by urging the Dominion government to make an appropriation sufficient to cover the cost of the exploration and survey recommended by the commissioners, which the Hon. Wm. Templeman informs us will be done at the early session to be held in November. In the meantime as a preliminary step Mr. H. P. Bell, C. E., has been instructed to compile and report upon all the information now in the government offices. Victoria Harbor.—When representing the advantages of the harbors suitable for oceanborne commerce situated on the south and west coasts of Vancouver Island, the port of Victoria was given prominence and the commission appeared to appreciate fully its magnificent approaches from all points, ease of access and freedom from fogs. The following are the recommendations made to the Dominion government:

"That in accordance with the principle heretofore affirmed, the government of Canada proceed to obtain by negotiation, purchase, expropriation or otherwise, all such lands on the waterfront of the port of Victoria, or reasonably usable in connection therewith, as are owned or controlled by the province of British Columbia or the city of Victoria or other public bodies, together with such other lands as the circumstances show to be reasonably necessary, and all now in possession of or owned by the Dominion government be thereafter owned, held, administered and controlled by the government of Canada for the public benefit, and with the view to the accommodation of all interests which now or hereafter may desire to centre at or use said port."

"That as soon as the land above mentioned, has been obtained, a competent engineer be appointed to make a full report on the improvements asked for in the inner harbor, as well as on the question of breakwater accommodation so as to enable your government to deal with the matter of improvement and to decide what are advisable for immediate construction."

Mr. G. A. Keefer, agent Dominion government department of public works is now engaged in making a report upon the most feasible plan of increased harbor accommodation, including an estimate of the cost of a breakwater between Brodie ledge and Holland point.

The dredge "Mudlark" has been operated almost continuously in deepening the channel of the inner harbor of Victoria. Another plant has been engaged in removing rocks in the channel which has been deepened and a uniform depth 16 feet at low tide will soon be secured below the railway bridge, but until the arrival of the new dredge, now under construction, which is to replace the "Mudlark" progress will be slow. The works now proceeding are in accordance with a plan of general harbor improvement prepared by this board and adopted by the government. That plan, however, was presented as preliminary to another of more general utility and the time has now arrived for its preparation.

In October last the provincial government called for tenders for the purchase of lots 5703 when the board's committee waited upon the chief commissioner of lands and works and asked that the property be not disposed of until the Dominion government could be communicated with. This request was granted, and the Dominion government now is requested to acquire the property in the interests of the port, it being pointed out that a high building, if erected on the property in question would be a menace to navigation. The matter is not yet settled, but in the meantime the lot has been rented, month by month, with building restrictions and Mr. G. A. Keefer will deal with the question in his report on Victoria harbor improvements generally.

National Free Port.—The royal commission on transportation also recommended to the Dominion government the establishment of national or free ports and included in the list the port of Victoria. It is recommended that the lands adjoining and reasonably usable in con-

nection with navigable waters shall be acquired by the Dominion government, and subsequently, by proclamation of the governor general, the port shall be declared a national port, and that thereafter, no port or dock (other than dry dock or elevator) charges shall be levied by the government, or allowed to be collected by any government official at that port.

Pilotage.—The last recommendation involves a national policy and although there is no reason to believe that a decision will be long deferred, it was thought advisable to fully acquaint the royal commission on transportation with this board's endeavor to have compulsory pilotage abolished at the ports of Victoria and Esquimalt. The fact every fully presented and after due consideration, the commission recommended to the Dominion government as follows:

"That in view of the fact that in many cases the present charges for pilotage appear to be without warrant of law, but rather to be based on the desire of the board of pilotage commissioners to get away from the injustice of having to make heavy charges for services not rendered (many masters regularly and by preference, taking out or bringing in their own vessels, whether paying the charge or otherwise) your commission would recommend that the regulations governing pilotage be amended to suit the circumstances of the port, and that no charge be made while no pilot is employed, in cases where it appears to be reasonable to allow all masters, or those of certain boats or lines of boats, to bring in their vessels without the aid of a pilot."

Ship Building.—Shipbuilding being a matter of national importance the presence of the royal commission on transportation was availed to represent the disabilities under which that industry is carried on in Canada. In brief the case was stated as follows:

"The inconsistency of the position in which our shipbuilders are placed lies in the fact that a ship can be imported free of duty, built, machinery, and every other thing old country labor, while our builders have to pay duty on most of the raw materials they use, as well as a heavy duty on the machinery which they may import, amounting to twenty-five per cent."

It was further stated that machinery represents about one-half the value of the completed ship.

The commission in reporting to the Dominion government recommended:

"In view of the fact that your commission was appointed to deal with matters of transportation, and that these are so vitally affected by the amount of tonnage suitable for the trade, and that tonnage can nowhere be so well supplied as from our own Canadian yards, your commission feel that the question is one with which they should deal, and that reasonable assistance necessary to cause a revival of an industry of so great importance should be given, and would therefore, recommend that a bounty of \$5 per ton gross register, be paid by the government of Canada on all wooden vessels, sailing and steam of 500 tons or over commenced and built in Canada after June 1, 1906, and \$6 per ton gross register on all such iron or steel vessels of 500 tons or over so commenced and built after that date."

Recently the B. C. Marine Railway company of this city tendered in competition with the shipbuilders of the Dominion and Great Britain for the construction of a survey ship to be used by the Dominion government in the northern Pacific waters. Their tender was the lowest received from Canadian shipbuilders but the government have not yet awarded the contract because a still lower tender was received from Great Britain. Apart from the approved and established policy of supporting local industries, we consider that this province has a strong claim upon the federal government on account of the large sums paid into the Dominion treasury in customs duties and internal revenue being three times as much per head as is collected from the remainder of the Dominion.

A committee of this board is engaged in preparing a memorial in this connection which will form an appendix to this report.

Aids to Navigation.—In recent years the Dominion government has done much towards assisting navigation on the Pacific coast in the waters under Canadian jurisdiction but the impossibility of providing for every contingency was most forcibly illustrated in the recent total losses of the sailing ship "Pass of Melfort" and the steamship "Valencia" on the southwest coast of Vancouver Island. It was ascertained that some of the sailing ships reach these waters unprovided with proper sailing charts and the investigations into the loss of the steamship "Valencia" by the United States government and the government of Canada, both acting independently, went to show that the vessel was not skillfully handled. In order to avert further loss of life and property about the entrance to the Straits of Fuca, the committee on harbors and navigation examined all the conditions very thoroughly and made recommendations which have been generally approved, and when established, will, no doubt, make the southwest coast of Vancouver Island as safe as possible.

It is to be regretted that although the summer is far advanced more has not been done towards carrying out these

suggestions. Nevertheless since the late lamentable accidents on the west coast, a lifeboat station has been established and a lighthouse has been placed on Amphitrite rock, arrangements have been made for another at Pacerna point and improvements have been made in the lights at Race rocks and Carmanah and now that the estimates for the current year are available it is to be hoped that the construction of a suitable trail or wagon road between Bonilla point and Bamfield creek will be commenced by either the Dominion government or provincial government and that other safeguards recommended by this board will be speedily carried to completion.

Steamship and Railway Services.—The steamship services with Victoria have been greatly improved. The daily services between Victoria and Puget Sound are maintained by seaworthy vessels with good passenger accommodation; but it was only by the vigorous protest of this board that the Alaska Steamship company was prevented from doing that business with an inferior vessel.

British Columbia northern ports and Lynn Canal ports are also well served and on the west coast of Vancouver Island the trade has grown to such an extent as to necessitate the operating of a larger steamer. Victoria is exceptionally well situated for Australian and Oriental trade and many steamers engaged call at this port which do not enter other Canadian ports.

Canadian Pacific railway freights are delivered in cars by ferry connection at Ladysmith and the Great Northern railway cars reach Victoria by ferry connection at Sydney. The advantages of these ferry services enable Victoria merchants to compete favorably with other coast cities.

Railway Commission.—Although the Canadian Pacific railway have invariably met the representations of this board in a friendly spirit and generally acceded to our wishes, the Victoria merchants felt compelled to join the merchants of other coast cities in a complaint that the company is discriminating against coast cities in favor of Winnipeg. The distance from Calgary to Winnipeg is 840 miles and from Calgary to the coast, 640, but rates are lower from Winnipeg. The facts have been placed before the railway commission and it is hoped a decision will be given in favor of the coast cities. After failing to obtain any redress from the Canadian Pacific railway all the facts were laid before the railway commission and it is hoped that a decision will soon be given and that it will be in favor of the coast cities.

The coast merchants were also threatened with another discrimination in an application for mixed freights in carload lots from eastern Canada. The Victoria merchants sent delegates to Montreal and assisted in defeating that application.

Tariff Commission.—A revision of the tariff being under the consideration of the Dominion government, a commission was appointed and visited Victoria for the purpose of taking evidence upon existing conditions and changes desired. The board placed its room at the disposal of the commission for their sessions in this city, but considered the subject one that should be left principally to the various individual interests affected. A delegation from this board, however, appeared before the commission in Vancouver and supported the application of the boards of trade of other coast cities for placing on lumber entering Canada from the United States a duty equivalent to that levied on Canadian lumber when exported to the United States. This action saved much time that would otherwise have been spent in presenting the case a second time. At a later date, the following resolution in regard to the duty on tin plate was adopted and forwarded to the honorable minister of finance:

"Whereas we have learned from eastern sources that the Canada Tin Plate and Sheet Steel company of Morrisburg, Ontario, have petitioned the government for a protective duty of 33 per cent on tin plate, and whereas the granting of such petition, would, in the opinion of this board, cause considerable loss to manufacturers all over the Dominion, retard the development of certain canning industries and cause a general advance in prices to the consumer. Be it therefore resolved; That this board enter a strong and emphatic protest against any duty being placed on tin plate and that the honorable minister of finance be notified accordingly."

Railway Matters.—The board received a memorial from the Dawson board of trade relating to transportation charges on the White Pass and Yukon route, and a request for an endorsement of the demands the Dawson body for a reduction in rates. After giving the subject much consideration, it was thought inadvisable for this board on an ex parte statement to commit itself to anything more than a request to the Dominion government to investigate the complaints made, and a resolution to that effect was adopted. The Dominion government has decided to make the investigation.

THE CANADIAN TAYLOR AUTOMATIC FIRE ALARM and CALL BELL CO., LIMITED

OF
VICTORIA, B. C.

The above Company is now incorporated under the laws of British Columbia with a capital stock of \$50,000.00, divided into 10,000 shares of \$5.00 each. Terms of sale, half cash, balance in two equal payments.

This company is incorporated for the purpose of manufacturing and installing the Taylor Fire Alarm, the only perfect Automatic Fire Alarm yet invented. The question is, will it work, and will it pay dividends? Let me answer the first part of your question. A Syndicate of good Victoria Merchants have been manufacturing and installing the Alarm in a small way for the past six months. The following is a list of a few that have had the Alarm installed, and I can show you in this office their testimonials:

Government House, Nanaimo Brewery, Windsor Hotel (Nanaimo), The Shawngnan Lake Lumber Company, The Taylor Mill Company, J. A. Sayward Lumber Mill, E. G. Prior & Co., Ltd., and W. J. Penderay's residence, and others. In answering the other part of your question, "Will it pay dividends?" I say, "Yes." Every manufactory, mill, business house, hotel, public building, residence, steamers, etc., will have them installed, as it is the most perfect protection from fire, and will cheapen insurance; the cost of installation is small and within the reach of everybody. If you already have the electric call bells, no wiring is necessary.

The Syndicate have already received satisfactory dividends and only operating in a small way, and their reason for selling stock now is to raise capital to push the business all over Canada. The Fire Alarm and Call Bell will be installed in my office at once and can be tested Tuesday, the 26th instant. Not more than 4,500 shares of stock will be offered for sale at this time, and as many have already stated that they wish to purchase stock, I would suggest that you lose no time in applying for stock in the Company. The Company will be prepared to receive application for allotment of stock on and after Thursday morning at 10 o'clock, June 28.

All Applications for Stock Must be Made to

YEAR'S WORK OF BOARD OF TRADE

(Continued from Page Six.)

tion and the chairman of the railway commission will visit Dawson this year for that purpose. The application of the Pacific and Eastern Railway company for a charter authorizing the construction of a line from Victoria to the northern end of Vancouver Island and also from a point on the line to Hudson's bay by way of Butte inlet, Edmonton and Prince Albert, was endorsed by the assembly opposed in parliament by certain railway companies and was defeated. The Canadian Pacific Railway company and the Grand Trunk Pacific Railway company have obtained parliamentary sanction for the construction of lines in Vancouver Island. It must be a source of satisfaction to the people of Victoria to know that the great railway companies and prominent railway promoters are beginning to appreciate the very great importance of the place which Vancouver Island will occupy in the transportation systems of the country and the large amount of traffic certain to be created by the development of its resources.

Salmon—Salmon canning is a new industry in Victoria. In 1904 two traps were operated in the south coast of Vancouver Island with such satisfactory results that last year the number of traps was increased to fifteen and there are at present in operation twenty six traps, one of which is practically within the city limits. The 1905 pack of the cannery erected in Esquimalt harbor last year was 35,000 cases being the catch of only four traps; the salmon caught in the other eleven traps having been canned on the Fraser river. This year another cannery has been established at the outer wharf, Victoria. The traps are operated by white labor and about 150 men are employed at good wages.

It is too early to forecast probable results of this year, but the catch of spring salmon has been very good and has kept two packing establishments busy. Several car loads of spring salmon have been shipped and this new industry has also stimulated local commerce and the demand for ice has largely increased.

These results fully justify the strenuous efforts and success of this board in getting permission to operate fish traps in the southern shores of Vancouver Island. The enterprise is yet in its initial stage but destined to become an important factor in the progress of Victoria for it will not be long before all the fish caught in the local traps will be canned on the spot or as near there to as possible, being tributary to this city in any case.

Victoria, B. C., June 30, 1906.

F. Elworthy, Esq., secretary, The Victoria, British Columbia board of trade, Victoria, B. C.

Dear Sir—I have much pleasure in enclosing herewith a short report on agriculture and immigration as requested in your letter of the 20th inst., and trust that same will cover the information asked for.

ROBT. G. TATLOW,
Minister of finance and agriculture.
Satisfactory progress was made in all branches of agriculture during the year, Victoria district (which includes the islands) showing in the general prosperity. The total estimated value of agricultural products for the province, from statistics compiled by the department of agriculture, aggregated \$6,482,396, a gain of \$487,718 over 1904, to which the islands contributed \$1,214,240; the principal items being: fruit, \$37,440; butter, \$230,450; eggs and poultry, \$87,500; cattle, \$67,500; sheep, \$62,500; swine, \$37,500; hay, \$177,600; oats, \$91,500; barley, \$70,620; wheat, \$9,230; peas, \$25,600; potatoes, \$63,750. Other roots, \$155,000.

One of the most notable events of the year from a horticultural point of view was the exhibition of a carload of British Columbia fruit at the Royal Horticultural society's show in London, England. The exhibit was transported to London free of charge by the Canadian Pacific railway, and arrived there in prime condition, and was greatly admired by British fruit experts and the public generally. The gold medal of the society was awarded to the collection of apples and in addition seven medals were awarded to individual exhibitors.

DIED SUDDENLY OF HEART DISEASE.

How frequently does a head line similar to the above greet us in the newspapers. The rush, push and strenuousness of the American people has a strong tendency to lead up to valvular and other affections of the heart, attended by irregular action, palpitation, dizziness, smothered sensations and other distressing symptoms.

Three of the prominent ingredients of which Dr. Pierce's Golden Medical Discovery is made are recommended by some of the leading writers on *Materia Medica* for the cure of just such cases. Golden Seal root, for instance, is said by the UNITED STATES DISPENSARY, a standard authority, "to impart tone and increased power to the heart's action." Numerous other leading authorities recommend Golden Seal as an unsurpassed tonic for the muscular system in general, and as the heart is almost wholly composed of muscular tissue, it naturally follows that it must be greatly strengthened by this superior, general tonic. But Golden Seal is not the most important ingredient of "Golden Medical Discovery," so far as its marvelous cures of valvular and other affections of the heart are concerned. It is Stone root, or *Collinsonia Can.*, Prof. Wm. F. Fernald, author of *Fernald's Epitome of Medicine*, says of it:

"I, not long since, had a patient who was so much oppressed with valvular disease of the heart that his friends were obliged to carry him upstairs. He, however, gradually recovered under the influence of *Collinsonia* (medicinal principle extracted from Stone root), and is now attending to his business. The afflicted that was near at hand. *Collinsonia* unquestionably affords relief in such cases, and in most instances effects a cure."

Among the samples of apples which won the highest award were several from the Victoria district, including fine specimens of Ribston Pippins and Blenheim oranges. The improvement in the fruit growing industry—marked throughout the province—has made itself felt in Victoria district, many new orchards being planted while the acreage of strawberries and other small fruits has been materially increased. Fruit growers are devoting more care to their orchards, and by the adoption of scientific treatment are raising the standard of quality as well as the quantity of their fruit.

It is gratifying to report that many new comers have purchased small fruit culture, poultry farming and dairying; those minor industries which add so greatly to the city's growth and prosperity and to which the soil of this district is so well fitted.

As a result of investigations recently made by expert viticulturists certain districts tributary to Victoria have been pronounced capable of producing grapes on a large scale. It has also been discovered that the climate is very favorable to the breeding of silk worms and a company is now being financed in London with the object of embarking in the production of raw silk. The fact that *Smayra* figs were found growing wild near Nanaimo encourages the hope that the mulberry and grape will flourish with cultivation, and that two new and important industries are on the eve of being established.

One of the most serious obstacles to progress with which the farmer and fruit grower has to deal, is the scarcity of labor; or rather, the total absence of adequate labor to carry on the work of the farm and orchard. Farm help is hard to get, even at high rates of wages, and as the situation becomes more acute each season the necessity of devising some plan looking to a satisfactory solution of this difficult problem is worthy of public attention.

Probably the most important announcement of the year was that made by the management of the Esquimalt & Nanaimo Railway company with regard to its land grant of about 1,500,000 acres foreshadowing the transformation of the primeval forest to fruitful farms and orchards, the avowed policy of the company being the reclamation of large tracts of land to the uses of the human hand. The formidable task of land clearing has begun already, and it is hoped that several hundred acres will be prepared for cropping by the spring of 1907. The commendable action of the company cannot fail to attract a desirable class of settlers to Vancouver Island and create new fields of trade for the merchants of Victoria.

Congress of Chambers of Commerce of the Empire—On July 10th-13th, the Sixth Congress of Chambers of Commerce of the Empire will be held in London, England. Our delegates are the Hon. J. H. Turner, Robert Ward, and A. P. Luxton who will submit the following resolution, re-consultative service: "That in view of the great importance of accurate and intelligent reports upon current commercial conditions in all parts of the world, the imperial government be urged to make it a condition that those appointed to consult posts should have practical knowledge of commercial requirements."

Our delegates will also extend an invitation to hold the seventh congress of chambers of commerce in this city, communicated in the following letter:

June 22, 1906.
Thos. F. Blackwell, Esq., D. L., J. P., chairman and delegate to the Sixth Congress of Chambers of Commerce of the Empire, London, Eng.

Gentlemen—The president and members of the Victoria, British Columbia board of trade desire to direct the attention of the 6th congress of chambers of commerce of the empire to the trade of the United States and Canada with the Orient which has already increased to an extent hardly hoped for by the most sanguine observers a few years ago. Not long ago that trade was done via San Francisco, but steadily and with unexampled rapidity Canadian and Puget Sound ports have shared in it and today enjoy an equal or possibly larger volume of business with the Orient and Australia than is done from San Francisco. This diversion of trade is due to geographical causes, which are influencing the policy of all the great transcontinental United States railway systems interested in traffic to or from the Orient, two of which have already termini in British Columbia. In the very near future Canada will have two or more additional transcontinental railways with termini on this coast. Account must also be taken of the great activity in northwestern portion to which a tide of immigration has set in hitherto unprecedented. Besides the immense area in the northwest suitable for agriculture in this province of British Columbia we have also much land suitable for agriculture and fruit growing with practically unlimited natural resources in minerals, timber and fisheries. With such powerful factors as these the increased trade which will assuredly follow and find an outlet in the Pacific coast will assume proportions and magnitude of which cannot be estimated. It will be well, therefore, for builders of the empire to keep in close touch with the progress of Canada generally but particularly with this western portion.

For these reasons the Victoria, British Columbia board of trade desire to extend to you a very cordial invitation to hold the seventh congress of chambers of commerce of the empire in this city, the capital of British Columbia, as we are fully assured that in no other part of the British empire could the delegates assemble with similar instructive advantages.

T. W. PATERSON, President.
F. ELWORTHY, Secretary.

Visitors—On November 9th last, the board was honored with an address by Mr. J. S. Larke, Canadian government commercial agent, who was returning to Sydney, N. S. W., where for several years past he has done much in developing trade between Australia and Canada. This board of trade greatly appreciates the work he has done and on the occasion mentioned received very valuable suggestions for increasing that trade. The opportunity was also availed of to discuss the desirability of securing preferential treatment in trade between Canada and Australia. The board found in Mr. Larke a very strong advocate of this policy who, after recommending the steps to be taken in Canada promised that he would act vigorously towards the same end upon reaching the seat of his labors.

On 28th May of this year Professor J. C. McLennan, director of the Physical laboratory of the Toronto university, delivered a lecture, under the auspices of

the board, upon the Metric system of weights and measures. The subject was presented in a lucid and entertaining manner and favorably impressed the large audience. The board is indebted to Hon. Wm. Templeman, minister of inland revenue for this courtesy and instructive address.

Trade Commerce and Outlook—It may be stated without fear of contradiction that the trade, commerce and business generally in Victoria was never in a healthier condition than it is at the present time and the feeling of optimism in looking ahead appears to be fully justified. Following are the results for the past twelve months:

TRADE AND COMMERCE	
Imports	\$3,354,274
Exports	1,401,817
SHIPPING.	
Entered	Cleared
Coast trade vessels ..2,325	2,304
Foreign trade vessels ..1,018	1,059
COLLECTIONS	

It has been demonstrated that the per capita contributions of the people of British Columbia to the revenue of the Dominion are fully three times as large as the average contributions of the people of the Dominion, and there is no doubt that this will continue to be the case for many years to come. Whether or not the expenditures of the Dominion in this province bear a just relation to these contributions need not be here discussed, but the fact above mentioned, fully justify the contention that a judicious outlay of public money along lines calculated to promote the development of the resources of the province and the consequent influx of population, will certainly prove an excellent investment for the country from a revenue standpoint. If, for example, by the expenditure of any considerable sum of money such an impetus could be given to the settlement of Vancouver Island, and the exploitation of its unsurpassed wealth that the population would be doubled, this would mean an additional annual contribution to the federal treasury from this island of probably \$1,000,000, without adding materially to the annual charges which the islands gets from the Dominion. Hence to give the argument specific application, if the establishment of all-rail connection between the island and the mainland would lead to the doubling of the population of the former, the Dominion government would be fully warranted in incurring a very large expenditure for that purpose from the island point of revenue alone, not taking into account the advantage to the whole country that would be derived from the utilization of the great resources of this valuable island of trans-continental and trans-oceanic routes of transportation. That such an increase in population may be confidently expected as the result of such all-rail connection is a claim which will not be disputed by anyone at all conversant with the natural wealth of the island and the strategic value of its seaports. The board, therefore, feels that in pressing upon the Dominion government the claims of Victoria and Vancouver Island generally for such expenditures as will secure this much desired railway connection with the mainland, it is acting, not only in the interests of the localities with the welfare of which it is most intimately concerned, but is taking a course which will prove of very great advantage to the whole of Canada.

There is a lack of information in the provincial government offices in regard to crown lands suitable for settlement and never before was such information needed to the same extent. It is gratifying, however, to learn that the financial position of the province has lately improved and it is hoped that the government will now see its way to inaugurate a policy of progress which will include a well digested plan of surveys on an extensive scale.

Civic and private improvements in the city of Victoria are progressing satisfactorily and the influx of population from Manitoba and the Northwest in search of a congenial climate and ideal surroundings after years of toil and acquiring of competency is most encouraging. The transfers of residential property and land suitable for fruit growing serve to indicate that the hopeful view of the future of this city and Vancouver Island generally is not confined to the older residents.

This opportunity is also availed to record the board's appreciation of the service rendered the citizens of Victoria by the Dominion government meteorological department, in charge of Mr. E. Baynes Reed, in issuing forecasts of the weather. Hitherto this information has been issued to the daily newspapers but now it is furnished daily direct to this board and to many merchants.

Note—From the foregoing it will be judged that the interest in the business of this board has been well sustained during the past twelve months and in closing, the hope is expressed

that even greater activity will prevail in the immediate future. It too often happens, that when prosperity is at hand there is a falling off of interest in public affairs. A very different spirit ought to prevail, because it is when times are good that prospects for the public welfare can be best advanced. This is emphatically a growing time in western Canada and if Victoria is to share fully in the general expansion her business men ought to be alert to see that the city shares in the advantages of the new conditions constantly arising, and to press upon those in authority the needs of the community.

BULLETIN ON MODEL FARM BUILDINGS

Recommendations For Improved Premises Issued by Agricultural Department.

The bulletin on model farm buildings which has been prepared by F. M. Logan, B. S. A., of the provincial agricultural department, was issued yesterday. It is a neat and well written volume of 50 pages and will fill a want which has been felt for many years. Contained in Mr. Logan's bulletin are models of up-to-date farm buildings, showing the latest ideas of sanitary arrangements, the lighting, ventilating and cleaning ideas being worth special mention. The new barn which is of Mr. Logan's design is to replace the old bank barn, a structure which was immensely popular in Ontario and the East only a few years ago. The bank barns have the advantage of being compact but at the same time the apartments where the cows (generally milking cows) are kept are very badly lighted and are also of inferior ventilation. The bulletin contains a picture of the bank barn on the property of Mr. A. C. Wells of Chilliwack, who also wrote a letter to Mr. Logan an extract of which reads as follows:

"We have on our farm an up-to-date 'bank' barn, built at a cost of about \$4,000. If I were building again, however, I would adopt your plans, as I can see that these stables would be much better lighted, easier to ventilate and keep clean, than our present stables. The barn on Mr. Wells' farm is the most expensive and latest barn in British Columbia having cost \$4,000. Mr. Logan is also in receipt of the following note from Mr. H. Davidson the secretary-treasurer of the Hastings Shingle Manufacturing company.

"Vancouver, B. C., June 27, 1906.
"F. M. Logan, Esq., department of agriculture, Victoria, B. C."
"Dear Sir—I am delighted with the plans of the new barn and stables which you kindly furnished me some time ago. The barn which I am building on my farm at Langley is now well under way, and, as it nears completion, its superiority over the 'bank' barn, which we proposed building before you brought the plans in question to our attention, is more and more marked. For convenience and utility it is going to be just about perfect, and the stables will be much more sanitary and so much better lighted than those in a 'bank' barn. While I am unable to say definitely, yet from the figures at hand I feel certain the cost will be at least 30 per cent less than it would have been had we gone on according to our original plans. This feature alone in connection with the design is a very important one in the construction of a building of considerable dimensions."

"The cow stalls I like very much, and will adopt the idea in our stables. It seems to me that, if farmers generally adopted them, the standard of our dairy products would be considerably raised and there would be little heard from health inspectors and milk vendors in regard to filthy stables and bad milk. "Thanking you for the interest you have shown in the building, and the trouble to which you have been put in connection therewith.
H. DAVIDSON."

From Mr. Davidson's letter it will be seen that from building a barn in accordance with the new model, not only is the builder getting a better building, but also saving from \$500 to \$800. Sir Arthur Stepey called at the department a few days ago and expressed his approval of the models and requested that blue prints be sent on to his ranch in Enderby and also his estate in South Wales.

Mr. George Heagie the manager of Sir Arthur's ranch at Enderby writes in complimentary tones on his receipt of the prints. The barn is built with an arched roof which dispenses with the usual beams—a new idea of considerable importance. The windows of the cow stable are well arranged and can also be used for extra ventilation in very hot weather.

Ventilation
A proper system of ventilation is another feature of great importance. Dr. J. G. Rutherford, before the agricultural committee of the House of Commons, speaking on tuberculosis in animals stated that: "Thousands of animals were yearly becoming affected, owing to unsanitary conditions under which their owners insist on keeping them, and the importance to live stock of thorough and effective ventilation was of infinitely greater value than tuberculosis. To put the case plainly, he stated that stockmen were breeding tuberculosis a great deal faster through neglect of this important subject of ventilation than it would ever be possible to stamp it out by promi-

uous use of tuberculin and the slaughter of diseased animals."

A statement such as the above gives sufficient proof, as to the usefulness of the bulletin. The cow and horse stables are of an entirely original design and will prove of great value to builders. In the last chapter a list of specifications is given and a farmer after getting the current price of lumber, in his neighborhood, can calculate in a very short time the actual figures of its cost. Four leading city architects have expressed their approval as to the good qualities of the new farm building; and they being easy to construct and low in price, it is expected that within a short time the buildings of several provincial farms and ranches will be remodelled.

Don't Do It—This hot weather don't stand over the hot stove looking after the roast. Use a self-basting roast pan, and it will do all the work. They cook the meat thoroughly. Prices \$1.00, \$1.25, \$1.50 and \$2.25. R. A. Brown & Co., 80 Douglas street.

CANCELLATION OF RESERVE.

One of Three Things Always Cause RHEUMATISM

Do you know the system rids itself of waste matter through bowels and kidneys? Yes, but by the skin as well.

As a matter of fact, the skin rids the system of more urea than the kidneys do.

If the skin, or bowels, or kidneys are unhealthy—they won't throw off enough urea. This urea is changed into uric acid—carried by the blood to joints and nerves—causing Rheumatism.

One never inherits Rheumatism. One does inherit weak kidneys, irregular bowels and bad skin action.

Fruit-A-Tives

OR "FRUIT LIVER TABLETS"

will positively cure Rheumatism because they increase the eliminating action of skin, kidneys and bowels—and make these three organs so vigorous and healthy that there can be no urea or waste retained in the system to poison the blood and irritate the nerves.

FRUIT-A-TIVES are fruit juices, combined with tonics—the whole forming the most effective cure for Rheumatism.

50c. a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED - OTTAWA

HAPPIEST PEOPLE IN THE WORLD

Address at Columbia University by Hon. R. Lemieux on the North America Outlook

One of the features of the recent graduation exercises at Columbia University was a speech by Hon. Rodolphe Lemieux. Addressing the graduates at the dinner given at the Metropolitan Club in New York, the Postmaster-General said:

It is no ordinary invitation to be called upon to address such an audience as generally meets in Columbia University. I duly appreciate the honor of speaking in an institution whose glory it is to mould, with other universities, the brains which shape the brilliant destinies of this great republic. Some people are wont to consider only the material success of a country without looking for the mainspring which sets matter in motion. They must be reminded at times that it is the men of thought that supply it, and that thinking men rule the world.

I would not like to pose before you as an austere moralist, but may I venture as a public man—though young in the career—to give the graduates of Columbia University a word of friendly advice? Are you looking for success in life? Most assuredly you are. You would not be Americans if that ambition were not yours. How will you succeed in life? Are a well-established reputation for intellectual ability, amassed erudition and literary skill a sufficient equipment to bring you to the fore?

Moral Qualities First

There are to my mind other qualities, other virtues, which are essential to success, and at the very foundation of the whole matter lie sterling honesty, intrepid courage and lofty ideals. Yes, with such an equipment each one of you can command unlimited respect and attain a measure of success, though his ability may not be above the average.

The moral culture which it has been your privilege to receive at Columbia will be your guiding star in life. It is of the essence of personality. It is the ultimate object of life, to find expression or outlet for personality. Sound morality is embodied in high standards of personal honor and self-respect, on which are based all decisions in the last court of appeal, that of conscience. But these, too, are the standards of good citizenship; for society is simply an elaborate mechanism for the realization of the individuals composing it. I am told that my esteemed friend

NEGLIGEE

COAT SHIRTS

Slip on and off easy as an old coat—hold their looks longer—launder better—more style and smartness to them. Try this made-right negligee coat shirt and you'll never go back to the over-the-head kind. In all good patterns and right fabrics. Ask for the brand—red label—look for the script letters.

Makers, Berlin

President Butler has devised a plan for the education of young men for careers in the Consular service, including special training in such subjects as the cost of production of goods for export and the best markets of the world available for the placing of such commodities.

Modern Education Incomplete

There was held last year in Brussels a congress on colonial expansion, at which education reform was discussed. Nearly every country in the civilized world was represented, and after protracted debates, the members of that congress were all agreed that modern education does not meet the requirements of the present day. The tendency of European methods, is they said, to dwarf the young man with too many books instead of aiming at building him into a powerful individual, physically and mentally strong, fit to conquer what is left of the universe to take hold of. When reading their idea of what a perfectly modern education should be, it occurred to me that if these European educationists had come to Columbia University, they would have found their desire realized, for a more thorough, a more intelligent system of education adapted to the requirements of an up-to-date citizen than the methods in use here could not be desired.

I must commend the scheme of President Butler, and in the study of foreign markets may I be allowed to call your attention to the vast commercial and economic possibilities of the Dominion of Canada, your nearest neighbor, and one of your best customers? Remember, sir, that vast as are the resources of the American Republic, wonderful as her mighty achievements have been, yet they are today measurable, whilst at this the dawn of the twentieth century, one does not know where bounds are likely to be reached in the development of Canada.

Let me point to a few plain facts. In area Canada is equal to the United States. In population she will excel the other country before many decades. Before the twentieth century elapses the Dominion will contain scarcely less than 80,000,000 of inhabitants.

Highway of World Traffic

With two fronts on two main oceans, with its lines of traffic by land and water running east and west rather than north and south, Canada, offering the shortest route to Japan—the land of the rising sun—and mediating between the centres of population and production in Europe upon the nearer and in Asia upon the further hand, will ultimately command the greatest through routes of the globe. From under our harbors on the Pacific and Atlantic is mined the coal that will bunker our shipping. We have the ambition of becoming the granary of the world, and our virgin soil is being filled by the hardy sons of the best races of the European continent—aye, it is already attracting over the borders some of the very best elements in the farming population of the United States. The manufacturing power of Canada will ultimately develop in proportion to its agricultural wealth. With the new transcontinental railways spanning its immense territory from sea to sea, Canada can well aspire to become one of the predominant economic powers of the world, whilst in days not far distant, if its triumphant phases of expansion continue, it will be the massive keystone holding together the arch of the great British Empire.

Believe in Ideals

But, above all, believe in ideals; pin your faith to them—it is the great incentive of life, and it is the privilege of youth to possess and to nurture them; it is its value.

The older generation believes in its experience, you must believe in all possibilities. Faith will tide you over the perilous voyage of life. Remember Columbus discovered the new world because he had faith—and God Almighty would have rewarded so much hope and so much faith by creating America if indeed it had not existed.

The most distinguished man who presides over the destinies of your country, who will be known in history as fearless in war and great in peace, has defined the American ideal with a forceful eloquence of thought which has been re-echoed all over the world. I need not refer any further to his opinion as to the American ideal, and I know that, generous as the students are, your aspirations go beyond the mere material success of this great Republic, and it is your aim to lift the public mind above pure materialism, to place it under the influences which ornament and embellish life, and give wealth the charm it does not possess in itself. It is the behavior of students of today, who will be leaders of the social world tomorrow, to cherish the ambition of bringing more of the milk of human kindness in political intercourse and more feeling of brotherhood in the settlement of problems sure to rise between the rival forces of capital and labor, to develop the sentiment of international justice as a guarantee of peace for the world. In this we Canadians are particularly interested.

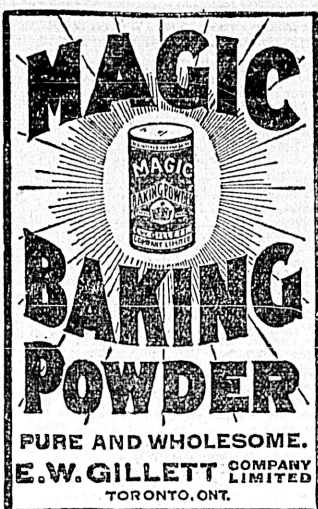

Neighbors and Friends

For nearly three centuries New France and then Canada and New England and the English colonies have lived side by side, with different vicissitudes in their career. For over one hundred years they were bitter enemies. This great struggle culminated in the conquest of Canada through the efforts of your forefathers, in a great measure, and then we all lived for a short time under the same flag, until, falling off with the mother country, you conquered your liberty with the help of France. Barring the misunderstanding of 1812, we have since lived as friends and settled our disputes and contentions by arbitration, in which, I am sorry to confess, you always have had the best of us. In the matter of trade we have been one of your best customers, and it is no fault of ours if I cannot return the compliment, for we are ready at any time to sell you all we can. We supply you with first-class labor, and your capital has taken hold of our best timber limits; the largest lumbering firms in Ottawa are American.

When the British parliament was forming a constitution for Canada in 1791, Fox, the great English statesman, warned his colleagues in the Commons not to be ungenerous in the measure of liberty to be given to the colonies. "Let them be treated in such a manner as they would have nothing to envy when comparing their lot with that of their neighbors," Fox's good advice was not followed at once, but I am glad and proud to say that now in the domain of civil, religious and political liberty we have nothing to wish for.

We have every reason in the world to cultivate your friendship and none whatever to disturb peace on either side of the line which runs between the two countries from ocean to ocean. It is Canada's fondest ambition to be your neighbor in the best of peace and in the race for prosperity. With large fields open to ambition on both sides of the line, with possibilities unbounded, the people of the United States and of Canada now live in peace and may be looked upon as the two most prosperous and happy countries in the world.

With greater blessing could Providence give us!

AGAIN MR. COLLINS.

Petitions Another California Judge Seeking His Liberty.

Justice Lorigan of the supreme court yesterday handed down a brief opinion on the petition of George D. Collins to be permitted to leave the County Jail and attend to matters relating to his case at the county clerk's office, says the San Francisco Chronicle.

The petition had been addressed to Justice Lorigan personally, and because of that fact received scant courtesy, the justice holding that, irrespective of the merits of the case of the petitioner, the petition should have been presented to the supreme court as a body and not to any individual justice.

The further ground was taken that, inasmuch as action was pending on the same matter in the district court of appeals, the supreme court had no right to pass upon it until the case had been disposed of by the district court.

Collins appeared in Judge Trout's court yesterday morning, arguing with his accustomed volubility on a motion to be admitted to bail. The testimony concerning Collins' health, already given by medical experts in habeas corpus proceedings before Judge Murasky, was admitted in evidence and the decision of the court reserved.

Good Health for Business Men

To the increase of sedentary pursuits, confinement to offices and lack of exercise, Dr. Fisher of New York ascribes the great increase in diseases of digestion and circulation. "Men are not breathing deep enough," he said, "to throw off the poisons of the system, and very few of our business men really know the joy of living."

When the filtering and excretory organs—the liver, kidneys and bowels—fail to perform their duties of extracting poisons from the blood it is time for prompt action before some serious disease fastens itself upon the system.

People of sedentary habits are sure to suffer from constipation, biliousness, and kidney derangements, but there is cure in the use of Dr. Chase's Kidney-Liver Pills, and note that we do not say merely relief but cure, prompt and thorough cure. Medicines which only act on the bowels may afford relief, but Dr. Chase's Kidney-Liver Pills do more than this—they enliven and invigorate the action of the liver and kidneys, insure a good flow of bile, Nature's own cathartic, and so effect thorough cure. One pill a dose, 25 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto.

New York City, APR 9 1906.

RECEIVED of the Publisher of *Colonist, Victoria, B.C.*

One Hundred Dollars

for guarantee of circulation rating in Rowell's American Newspaper Directory.

THE PRINTERS' INK PUBLISHING COMPANY,

Leaffing Manager.

Publishers of Rowell's American Newspaper Directory.

COMMISSIONS.

The absolute correctness of a circulation rating in Rowell's American Newspaper Directory, as to be inserted in the next issue of the book, based upon a percentage statement from the publisher of a paper, of the actual issue for a full year, is guaranteed by the Directory publishers, under a contract of one hundred dollars, payable to the first person who successfully assails the accuracy of the said rating. The guarantee is made, and the statement is secured by the publisher of the paper, the payment of one hundred dollars to the publisher of the Directory as a permanent deposit. The guarantee is personal so long as the newspaper furnishes statements in detail only, not collected and the Directory continues to be published. The money paid is not returnable to the publisher at any time or under any circumstances.

THE ONLY NEWSPAPER IN BRITISH COLUMBIA

Whose Circulation Is Absolutely Guaranteed

THEREFORE:

The Only Newspaper in British Columbia of KNOWN VALUE as an Advertising Medium.

The publishers of "PRINTERS' INK," the leading printing trade journal, in its issue of April 18h last, inserted the above guarantee that "The Colonist" statement of circulation is correct.

The circulation rating of The Colonist can be ascertained at any time.

ADVERTISING CONTRACTS

Are made on this basis. "Cash is King, and Coin Talks." When you buy space in "The Colonist, you are not paying for padding, but good, live, cash-in-advance circulation. The circulation that goes into the homes is the circulation that counts.

GROWTH IN OKANAGAN.

Editor of Vernon News Tells of Great Fruit District of B. C.

J. Forsyth Smith, editor of the Vernon News, published at Vernon, in the Okanagan Valley, B. C., passed through the city on the 8th instant, on his way to spend a few weeks at his old home at Truro, N. S., says the Winnipeg Free Press.

During his sojourn in the Pacific province Mr. Smith has imbibed a vigorous enthusiasm for things western, and particularly for those pertaining to the Okanagan. He speaks in the most glowing terms of the possibilities of the Okanagan, the garden of British Columbia, and it must be admitted, he has facts at his finger ends which go a long way towards proving his contentions.

Within the past few years a great change has come over the Okanagan.

as a result of the large influx of population into the district from the Northwest Territories and Manitoba. The large holdings which formerly regarded settlement have nearly all been cut up into ten and twenty acre lots, which are finding a ready sale, every train bringing in well-to-do farmers, who have made a comfortable stake in the prairie country and are now looking about for a pleasant retiring place, which may assure them a moderate competence under desirable climatic and other residential conditions. Vernon, the centre of the Okanagan, has gone ahead with rapid strides. Within two years its population has nearly doubled and a great amount of building has been steadily going on.

The Coldstream ranch, Lord Aberdeen's splendid property, situated five miles from Vernon, has been of the greatest value to the Okanagan in advertising extensively its possibilities as a fruit-growing country, and in carrying on the necessary preliminary experimenting work of which newcomers now reap full advantage. The ranch, which has recently passed into the hands of a limited company, comprises some 13,000 acres, of which 2000 are under cultivation, 200 being set out in fruit, comprising pears, plums, grapes, cherries, etc., and the finest acreage of Coldstream land, susceptible to cultivation for fruit purposes, while it will also put under water some 6000 acres of other land in the White Valley, which has hitherto been available only for range and wheat.

Some Trophies
Mr. Smith states that Okanagan fruit is earning an enviable reputation for itself. Last year, for the first time, the first prize gold medal of the Royal Horticultural Society went to British Columbia in competition with the best fruit districts of the British empire. In this exhibit the Okanagan was well represented. At the same time the Royal Horticultural Society awarded eight silver gilt medals to individual exhibitors from British Columbia. Of these no less than five were from the Okanagan.

Questioned as to the profits in the fruit business, Mr. Smith stated that last year the Coldstream ranch received \$10,755 net from a 20-acre orchard of 12-year-old Northern Spies, John Gummow of Peachland received at the rate of \$300 an acre for peaches on the trees, the shipper taking all care of the fruit from early spring till maturity and accepting the risk of marketing. The net proceeds of an acre of apple trees which have reached maturity should not be far from \$200, while strawberries may produce from \$350 to \$400 per acre.

A very large number of fruit trees have been set out in the Okanagan during the past year, and a total of nearly 200,000 can be no very great exaggeration. In Vernon alone fruit was shipped during the past season to the extent of 1,600,000 pounds, a small earnest of the immense quantities that will be produced by the newer orchards not yet in bearing.

The electric arc in which titanium has been distilled has a temperature of about 3,500 deg. C. Making allowance for uncertainty as to pressure in the solar atmosphere, M. Moleson concludes that the sun where titanium is seen in the solar spectrum to be volatilized must have a temperature between two estimates of sun heat already made—6,500 deg. C. and 2,000 deg. C. The probability is that the latter is nearer to the truth. This is very much lower than early estimates.

FINANCE AND COMMERCE.

New York, July 13.—Bradstreet's tomorrow will say: Canadian trade is relatively most active in the newer provinces, where good grain prospects, large immigration and active building are features. In the Eastern provinces the features are the heavy export demand for dairy products and the gain in orders for fall dry goods and hardware over a year ago.

Most of the indications are that the wheat crop is heading well and a large crop is looked for. Butter and cheese exports at Montreal are large. Canadian canned meats are reported supplanting many of the United States goods at Toronto, which also reports cheese stocks light and holdings scarce and high. There is a fair export demand for flour at Winnipeg. Trade is active in all lines in British Columbia, where new salmon prices are expected to be higher.

Failures for the week number 19, as against 18 last week and 20 in this week a year ago.

The following the weekly bank clearings: Montreal, \$33,561,508, increase, 25.8 per cent. Toronto, \$25,157,200, increase, 17.5 per cent. Winnipeg, \$10,730,808, increase, 48.0 per cent. Ottawa, \$2,014,722, increase, 12.2 per cent. Halifax, \$2,014,722, increase, 5.2 per cent. Vancouver (for mainland of B. C.), \$3,504,217, increase, 51.0 per cent. Quebec, \$2,071,855, increase, 18.0 per cent. The total, \$1,083,272, increase, 4.0 per cent. St. John, N. B., \$1,401,030, increase, 25.9 per cent. London, \$1,437,143, increase, 12.2 per cent. Victoria, \$363,972, increase, 6.3 per cent. Calgary, \$1,068,000, increase, 10.0 per cent.

Wall Street Gossip

New York, July 13.—An extremely uncertain state of speculative sentiment developed in the stock market today after prices had yielded sharply under a continuance of the selling in evidence yesterday, and the market recovered somewhat with some semblance of further strength. There was no new development to account for the recovery. Most of the demand was attributed to the uncovered professional short interest. The lack of good news of a striking character to account for the delivery was the occasion for pointing out the contrast with the recent market, when any such news had become known and on every such occasion had been taken advantage of to market stocks.

The extent of the recovery was not sufficient to force bears to cover, however. Rates for call loans were easy for a Friday. Rates for foreign exchange were lower discount yielded in London and sterling exchange rose in Paris. The market tone was uncertain throughout and the closing was feverish on small dealings.

Bonds were irregular; total sales, par value, \$1,170,000. United States two advanced 5/8 per cent. on call.

THE WEATHER.

Meteorological Office.

Victoria, July 13—8 p. m.

SYNOPSIS.

The low pressure area over Arizona remains mainly stationary and the only resulting rain has been with a thunderstorm at Salt Lake City. Temperatures are above normal almost everywhere on the Pacific slope and decidedly so in the Kootenays and on the lower Mainland and this island and in the Pacific states of Oregon, Washington and California, 101 being again recorded at Red Bluff. In the northwest rain has fallen in Saskatchewan and the weather is mostly fair and much cooler.

Lower Mainland: Light or moderate winds; continued fair and warm today and Sunday.

Fifty Cents Black, watered Morine for Ladies Underskirts, 37 inches wide, today, 35c. Robinson's Cash Store, 80 Yates street.

DAILY REVIEW OF THE LOCAL MARKETS

The busy season in the local fruit market continues and wholesale houses are taxed to their utmost to comply with the demand. The price of cherries and raspberries has gone up considerably, especially the former, which are now very scarce. Some grocery stores yesterday bought a few cherries, which in size resembled plums, but they easily disposed of them at 15c. per lb.

Local tomatoes are now at their best and retail well. They are much finer both in point of size and quality to the imported article.

Yesterday a shipment of fruit arrived from San Francisco containing very fine peaches and plums. The peaches are retailing at \$1.20 per box containing about 16 lbs. The price for California plums is 60c. per box. Butter, with the exception of the Victoria creamery, continues to sell at the retail price of 30c. Eggs can now be bought which have been brought from Ontario. The are said to be practically equal to the new laid and sell well at 25c.

New hay grown this season is now on the market for feed purposes; the price is equal to that of last year—\$14 to \$16.

WHOLESALE MARKETS.

VEGETABLES.

Asparagus, per lb.	15
Beets, per sack	\$1.25
Cabbage, per lb.	3

COLLEGIATE SCHOOL.

Result of the Summer Examinations
Has Just Been Announced.

Respecting the Collegiate school summer examinations, the following letter has been received by the head master from Ven. Archdeacon Scriven, M. A., regarding the examinations which he has just conducted in the upper forms of the school.

Duncan, B. C., July 12, 1906.
J. W. Laing, Esq., M. A., Head Master, Collegiate School, Victoria, B. C.
Dear Mr. Laing: I enclose the boys' marks, totals and percentages in the upper school. Wilnot is again head of the school with a splendid percentage of 81. Barnes I, Barnes II, Pitts and Stoddart follow in the order named. Pitts has done some excellent work, but his papers are spoiled by his bad writing. It would pay him to learn to write decently. Bird and Wilkinson also deserve mention for some very good papers.

Latin was a very good subject in Form IV and so was English Literature. Euclid was disappointing, the comparatively low marks in this subject do not mean poor work. In nearly every case the propositions attempted were done well, but very few did much more than half the papers, the problems being almost entirely neglected.
In Form III, Monteith deserves great credit for his very excellent papers, and R. Stirling runs him close. The dictation and spelling in this form were first-class, and the Euclid and Algebra exceedingly good. English History was, perhaps, the weakest subject. Both forms did very well in Scripture. I consider that the examination this year has been most satisfactory, and that both masters and boys may be congratulated upon the result.

AUSTIN SCRIVEN, M. A.

LET THE STOMACH ALONE.

You can't cure catarrh by dosing the stomach. The disease is in the throat, nose and bronchial tubes. Inhale Catharhzone to the spot where the disease really is—it clears away foul secretions, stops discharges at once, purifies and heals the passages, literally annihilates every trace of catarrh.
Neither else is so direct and certain as "Catharhzone." Results guaranteed. Two sizes, 25c. and \$1.00.

LEGAL INTELLIGENCE.

(Before His Honor Judge Lampman) Cairns vs. The B. C. Salvage Co., Ltd. This was an action for \$200.25 claimed by one of the seamen of S.S. "Walworth" for services rendered during a wrecking

Pure salt is just as important as pure water or pure milk.
WINDSOR TABLE SALT
is absolutely pure and never cakes.

Use telephone to Duncan.

voyage in which the S.S. "Mariechen" was salvaged by the defendant company. The plaintiff signed on the "Mariechen" for a wrecking voyage not to exceed three months, final port of discharge Victoria. At the expiry of the three months and whilst the "Mariechen" was on the return voyage to Victoria with the plaintiff in tow, the plaintiff left the ship without leave at Treadwell mine. The plaintiff contended he was entitled to leave the vessel as his three months' engagement was completed; on the other hand the defendants contended that the time limit was only a particular of the voyage and that they were entitled to the services of the plaintiff until the completion of the voyage and the arrival at the final port of discharge, that the defendant by leaving the ship at Treadwell without leave had deserted and so forfeited his wages. His Honor on the completion of the case reserved his decision.

Mr. Moresby appeared for the plaintiff and Mr. Taylor, K. C., for the defendant.

HERPICIDE NOT A FAKE.

Unsolicited Testimonials Tell of Its Superiority.

Alf. R. Kelley, residing at 2195 Develand, St. San Francisco, Cal., writes the following:
"When I first purchased Herpicide, I thought like the majority of hair preparators, it would prove a fake. I am happy to state that, on the contrary, it is all, and even more, than you claim for it. Quite a number of barbers throughout the section in which I travel have called attention to the new hair sprouting out on my scalp, and inquired of me what I have been using. I tell them 'Herpicide,' also give them your name and address. Sold by leading druggists. Send for stamps for sample to The Herpicide Co., Detroit, Mich.
C. H. Bowes & Co., 98 Government St., Special Agents."

Workmen's Lodge.—At the general lodge meeting, held last night at the A. O. U. W. hall the Vancouver No. 5 lodge, of Victoria, were visited by the grand lodge masters from Vancouver. A speech was made by the supreme representative at the grand lodge sessions, held recently in Montreal, and was of the highest character. A meeting of the executive board will be held in the A. O. U. W. hall this afternoon at 3 o'clock. A press report of the proceedings will be given tomorrow.

The Police Court.—There was a light docket in the police court yesterday morning. There was one case, that of a Chatham street woman who was fined fifty dollars for being an inmate of a disorderly house. In the report of the dog case yesterday it was erroneously stated that George Irving was bitten by a dog owned by a neighbor. It should have been stated that it was the neighbor who was bitten by Mr. Irving's dog, and the dog has since been killed. The young man, Wall, who was acting strangely at the Gorge park some days ago, and who was taken in charge by the police for safe keeping has been removed to his home at Ballard, Washington, by relatives.

Use telephone to Ladysmith.

INTERPARLIAMENTARY MEETING

St. Petersburg, July 13.—The lower house of parliament today decided to send six of its members to the interparliamentary conference at London.

A TOTAL LOSS.

Napanee, July 13.—Dora Morden 14 years old was killed on the railway track here yesterday. He was riding a bicycle and waited for the ballast train to pass the crossing but did not notice the light engine on the other track.

KILLED AT CROSSING.

Sydney, N. S., July 13.—The Elder Dempster liner "Angola" which ran on the rocks near Louisa Tuesday morning while on the way from Mexico to Montreal cannot be saved. The steamer is loaded with hemp, coffee and asphalt which may prove an entire loss.

TO PROMOTE TEMPERANCE.

London Merchant Wills Million and a Quarter to the Cause.

London, July 13.—The will of John Crowley, a well known merchant of London gives \$1,250,000 for the promotion of temperance in England under the direction of the Wesleyan Methodist conference, conditioned on the church raising a like sum within five years.

MANAGER'S SUDDEN DEATH.

Toronto, July 13.—D. C. Dewar, manager in Montreal of the Bell Telephone company, died suddenly at the King Edward hotel yesterday evening from heart trouble. He was ill for some time and on the advice of his physician took a boat trip from Montreal to this city arriving here Wednesday.

Almost one-half of the new provincial loan of three million dollars has been subscribed.

VATICAN IS UNSAFE.

Discovery That Palace is Falling to Pieces.

Rome, July 13.—It has long been known that some parts of the Vatican are unsafe but it has just been discovered that the palace is practically falling to pieces. Even the corner where the Pope's apartment is situated needs strengthening and the pontiff is moving out. The walls which are cracked, bulging, and leaning outward will be temporarily strengthened immediately. To make the whole building safe will require more than \$100,000.

CHAMBERS OF COMMERCE.

Congress Adjourns After Deciding to Meet in Australia Next Year.

London, Eng., July 13.—Congress of chambers of commerce of the Empire adjourned last night after voting in favor of Victoria, Australia, as the next place of meeting. By a vote of 20 to 24 a resolution favoring the removal of this cattle embargo was defeated. It was moved by the Liverpool chamber and seconded by Mr. Catelli of Montreal. The majority took the view that not a chamber of agriculture was represented, hence the vote.

The motion asking for a change in the naturalization laws was also voted according to any citizen duly naturalized in any part of the empire full privilege wherever the flag flies, was declared lost.

R. J. Graham, Belleville, Ont., placed on record a resolution recognizing that the railways of Canada being for the general advantage of the empire should receive imperial consideration in any plan of imperial federation and defence. The principle of arbitration to settlement of international, commercial and labor disputes was endorsed in a resolution moved by R. S. Fraser of London, Ont.

Mrs. H. W. Du Bois, Philadelphia; L. W. Smith, Toronto; C. H. Wallie, Port Renfrew; F. S. Budlong, H. T. Dermid, F. G. Dawson, W. H. Lukie, Harold Leckie, R. Leckie, A. Gilchrist, Vancouver; R. E. Taylor, Calgary; F. Lovnds, Chatham.

A large number are planning to go to the Y. M. C. A. excursion to Fulford harbor, Salt Spring Island by the steamer City of Nanaimo on Saturday afternoon. Tickets have been reduced to fifty cents for adults and children alike. The Cecilia Orchestra under the leadership of Mr. Longfield will be present. Meals and refreshments will be served by the Ladies Auxiliary. A pleasant time is assured to those who take this beautiful journey among the Gulf islands.

FACIAL PARALYSIS.

Mr. W. J. Brennan, Western Hill, St. Catharines, Ont., writes: "My face was twisted out of shape with facial paralysis, and five doctors failed to cure or even relieve. By the persistent use of Dr. Chase's Nerve Food I have been entirely cured, and have returned to work strong and well. I have gained in weight and feel that I have a new lease of life."

Now Open.—The Royal Hotel and cafe, Fort Street, near Broad, is now open for business. The house has undergone a thorough renovation and remodeling and is both neat and comfortable, and at the same time homelike. Both European and American plans will be available while the rates will compare with any other houses of its kind in the city. The proprietors Mr. and Mrs. M. H. Macabe will give the house their personal attention and promise that no effort will be spared on their part for the comfort of their guests.

TERRIBLY DISTRESSING.

Nothing can cause more pain and more distress than Piles.
No wonder many Pile sufferers say their lives are burdens to them.
Ointments and local treatments may relieve, but cannot cure.
Dr. Leonard's Hem-Roid is guaranteed to cure any case of Piles.
If Hem-Roid doesn't cure you, you get your money back.
Hem-Roid is a tablet taken internally, thus removing the cause.
\$1.00 guarantee goes with every bottle. A month's treatment for \$1.00, at all druggists, or the Wilson-Fyle Co., Limited, Niagara Falls, Ont.

Off For Your Holiday?

Every year more and more people become converted to the change and out-of-door gospel, and start merrily for mountains and across the seas. New scenes and new ways mean stimulus and invigoration, and the same people come trooping home again with minds full of memories and bodies toned up until next vacation.
It's worth remembering that the more carefully your vacation is planned for the more satisfactory it will be. Give plenty of consideration to yours.

ON KEEPING COOL

SOME ADVICE TO MEN who want to keep cool: First, break up that thermometer; next, don't worry; eat little and drink less; finally, and this is the most important,

WEAR THE PROPER CLOTHING.

Strip off that heavy underwear that sticks to you like fly paper; put on a pair of these cool, light knee drawers made of thin, open mesh cotton, that cost only 75c. a pair. Then pull over your head one of these soft, thin cashmere shirts with short or long sleeves, at 75c. and \$1.00.

Better still, if you like them, wear a union suit of cool silk and lisle, \$3.50. A union suit, you know, takes away that bunchiness around the waist and stops you worrying how to hold up your drawers. Your stockings should be thin cotton or lisle.

Cotton, 12½c., 15c., 25c.
Lisle, plain or fancy, 25c., 35c., 50c.

Your shoes should be low cut—tan is coolest, but perhaps black is more liked. Have a look at our \$2.50 values, worth much more.

Your shirt should be of the soft-shelled variety, either percale Madras, flannel or silk, ranging in price from 75c. to \$6.50.

No Vest and No Suspenders, please! A belt which costs 25c. to \$1.50, will keep your trousers will "set up," and the coat will keep you "dressed up" although you feel as negligible as in a bathing suit.

The suit should be one of our cool, lightweight grey worsteds, which are now selling at \$13.75, worth \$20.00 to \$25.00.

Your hat, straw, of course. A soft brim is most comfortable, but those who would like a felt cannot do better than try one of our lightweight Rossini hats at \$5.50, the lightest hat made.

The collar should be linen—medium turnover—the Spencer, two for 25c., and the tie a washing Derby at 12½c. to 50c.

Use this advice as you please; it costs nothing; it is only meant to show that the men's store can fit you up in a jiffy for less money than you expect, and especially now during our 27th Annual Sale.
